Starvation as a Weapon Simone Hutter, 2015-09-29 In Starvation as a Weapon Simone Hutter explores within the framework of international law the legality of using deliberate starvation as a means to an end A close look at modern famine shows that in many cases food scarcity is not the product of coincidence but a side effect or result of a deliberate strategy Starvation is an efficient instrument when used to exert pressure and power in times of war and peace Simone Hutter demonstrates how

international human rights law and international humanitarian law prevent deliberate starvation as a means of achieving political goals. She focuses on highly divisive and under-discussed instances in which states deploy deliberate starvation domestically, i.e. within the state's own national territory. *When Misfortune Becomes Injustice* Alicia Ely Yamin, 2023-07-04

When Misfortune Becomes Injustice surveys the progress and challenges in deploying human rights to advance health and social equality over recent decades. Alicia Ely Yamin weaves together theory and firsthand experience in a compelling narrative of how evolving legal norms, empirical knowledge and development paradigms have interacted in the realization of health rights and challenges us to consider why these advances have failed to produce greater equality within and between nations. In this revised and expanded second edition, Yamin incorporates crucial lessons learned about the state of global health equity and public health systems during the COVID-19 pandemic, demonstrating just how incompatible the current institutionalized world order based on neoliberal financialized capitalism is with one in which the rights of diverse people around the globe can be realized. COVID-19 struck a world that had been shaped by decades of disinvestment in public health systems and social protection as well as privatization of wealth and gaping social inequalities within and between countries, and the evident crisis of confidence in the capacity of democratic political institutions and global governance was deepened by the pandemic. Yamin argues that transformative human rights praxis in health calls for addressing issues of structural inequality and political economy and working across disciplinary silos through networks and social movements.

Some are timeless topics that have had new life breathed into them.
