Mastering Pasta Marc Vetri, David Joachim, 2015-03-17 Award winning chef Marc Vetri wanted to write his first book about pasta. Instead he wrote two other acclaimed cookbooks and continued researching pasta for ten more years. Now the respected master of Italian cuisine finally shares his vast knowledge of pasta, gnocchi and risotto in this inspiring informative primer featuring expert tips and techniques and more than 100 recipes. Vetri's personal stories of travel and culinary discovery in Italy appear alongside his easy to follow detailed explanations of how to make and enjoy fresh handmade pasta. Whether you're a home cook or a professional you'll learn how to make more than thirty different types of pasta dough from versatile egg yolk dough to extruded semolina dough to a variety of flavored pastas and form them into shapes both familiar and unique. In dishes ranging from classic to innovative Vetri shares his coveted recipes for stuffed pastas, baked pastas and pasta sauces. He also shows you how to make light as air gnocchi and the perfect dish of risotto. Loaded with useful information including the best way to cook and sauce pasta suggestions for substituting pasta shapes and advance preparation and storage notes, *Mastering Pasta* offers you all of the wisdom of a pro. For cooks who want to take their knowledge to the next level Vetri delves deep into the science of various types of flour to explain pasta's uniquely satisfying texture and how to craft the very best pasta by hand or with a machine. *Mastering Pasta* is the definitive work on the subject and the only book you will ever need to serve outstanding pasta dishes in your own kitchen.

The Oxford Companion to Food Alan Davidson, 2014 the best food reference work ever to appear in the English language read it and be dazzled. Bee Wilson, *New Statesman*. First published in 1999 the ground breaking *Oxford Companion to Food* was an immediate success and won prizes and accolades around the world. Its blend of serious food history, culinary expertise and entertaining serendipity was and remains unique. Interest in food cooking and the culture surrounding food has grown enormously in the intervening period as has the study of food and food history. University departments, international societies and academic journals have sprung up dedicated to exploring the meaning of food in the daily lives of people around the world alongside an ever increasing number of articles, books, programmes and websites in the general media devoted to the discussion of food making the *Oxford Companion to Food* more relevant than ever. Already a food writing classic this Companion combines an exhaustive catalogue of foods be they biscuits named after battles, divas or revolutionaries, body parts from nose to tail, toe to cerebellum or breads from the steppes of Asia or the well built ovens of the Mediterranean with a richly allusive commentary on the culture of food expressed in literature and cookery books or as dishes peculiar to a country or community. While building on the Companion's existing strengths Tom Jaine has taken the opportunity to update the text and alert readers to new perspectives in food studies. There is new coverage of attitudes to food consumption, production and perception such as food and genetics, food and sociology and obesity. New entries include terms such as convenience foods, drugs and food, Ethiopia, leftovers, medicine and food, pasta and many more. There are also new entries on important personalities who are of
