Digital Design and Computer Architecture David Harris, Sarah Harris, 2012-08-24 Digital Design and Computer Architecture Second Edition takes a unique and modern approach to digital design introducing the reader to the fundamentals of digital logic and then showing step by step how to build a MIPS microprocessor in both Verilog and VHDL. This new edition combines an engaging and humorous writing style with an updated and hands on approach to digital design. It presents new content on I/O systems in the context of general purpose processors found in a PC as well as microcontrollers found almost everywhere. Beginning with digital logic gates and progressing to the design of combinational and sequential circuits the book uses these fundamental building blocks as the basis for the design of an actual MIPS processor. It provides practical examples of how to interface with peripherals using RS232 SPI motor control interrupts wireless and analog to digital conversion. SystemVerilog and VHDL are integrated throughout the text in examples illustrating the methods and techniques for CAD based circuit design. There are also additional exercises and new examples of parallel and advanced architectures practical I/O applications embedded systems and heterogeneous computing plus a new appendix on C programming to strengthen the connection between programming and processor architecture. This new edition will appeal to professional computer engineers and to students taking a course that combines digital logic and computer architecture. Updated based on instructor feedback with more exercises and new examples of parallel and advanced architectures practical I/O applications embedded systems and heterogeneous computing. Presents digital system design examples in both VHDL and SystemVerilog updated for the second edition from Verilog shown side by side to compare and contrast their strengths. Includes a new chapter on C programming to provide necessary prerequisites and strengthen the connection between programming and processor architecture.
