Intelligent Information Processing IV Eunikka Mercier-Laurent, David Leake, 2008-09-29 Knowledge existing in modern information systems usually comes from many sources and is mapped in many ways There is a real need for representing knowledge pieces as rather universal objects that should fit to multi purpose applications According to great number of information systems tasks knowledge representation is more or less detailed e.g. some level of its granularity is summed The main goal of this paper is to present chosen aspects of expressing granularity of knowledge implemented in intelligent systems One of the main reasons of granularity phenomena is diversification of knowledge sources therefore the next section is devoted to this issue

2 Heterogeneous Knowledge as a Source for Intelligent Systems Knowledge the main

element of so called intelligent applications and systems is very often heterogeneous This heterogeneity concerns the origin of knowledge its sources as well as its final forms of presentation In this section the selected criteria of knowledge differentiation will be presented in the context of potential sources of knowledge acquisition In Fig 1 an environment of intelligent systems is shown divided into different knowledge sources for the system Fig 1 Potential knowledge sources for intelligent information reasoning system Source own elaboration based on Mach 2007 p 24
