Discourse Analysis And Language Teaching:

Discourse in English Language Education John Flowerdew, 2012-11-27 Discourse in English Language Education introduces students to the major concepts and questions in Discourse Studies and their applications to language education. Each chapter draws on key research to examine critically a particular approach in the field providing a review of important literature examples to illustrate the principal issues concerned and an outline of the implications for their application to pedagogy. Features include coverage of a broad range of approaches in the field including Systemic Functional Linguistics and Register Speech Acts, the Cooperative Principle and Politeness, Conversation Analysis, Genre Analysis, Critical Discourse Analysis and Corpus Linguistics, analysis of a wide range of discourse examples that include casual conversation, newspapers, fiction, radio, classrooms, blogs and real life learner texts, a selection of illustrations and tables carefully chosen to enhance students' understanding of different concepts and approaches, stimulating discussion questions at the end of each chapter specially designed to foster critical thinking, reflection and engagement with the topics covered. Engaging, accessible and comprehensive, *Discourse in English Language Education* richly demonstrates how Discourse Studies can inform the teaching of English and other languages both as a foreign language and in the mother tongue. It will be essential reading for upper undergraduates and postgraduates with interests in Applied Linguistics, TESOL and Language Education. *Discourse and Context in Language Teaching* Marianne Celce-Murcia, Elita Olshtain, 2000 *Discourse and Context in Language Teaching: A Guide for Language Teachers* is part of the Cambridge Handbooks for Language for Language Teachers series. *Discourse and Language Education* Evelyn Hatch, 1992-01-31 *Discourse and Language Education* is part of the Cambridge Language Teaching Library series. *Discourse Analysis and Second Language Teaching* Claire J. The authors introduce approaches to discourse analysis in a way that redefines traditional topics and provokes the imagination of researchers. For those who have limited knowledge of discourse analysis, this book will help generate new questions about literacy events in classrooms. For those familiar with this research perspective, it will map diverse new approaches. Offers examples of classroom discourse with analyses that researchers and practitioners can use as the basis for pursuing their own analyses. Rob Tierney, Dean, Faculty of Education, University of British Columbia. *On Discourse Analysis* provokes us to rethink discourse analytic approaches as generative tools that can open up new ways of seeing language and literacy events in classrooms. The authors richly illustrate the complexity and potential of discourse analysis studies with cases that orient us to foreground the local with broader cultural, historical and social relations in ways that make evident what it means to be human. *On Discourse Analysis* provides a fresh approach to discourse analysis studies. Kris Gutierrez, University of California at Los Angeles. *Language as Discourse* Michael

McCarthy, Ronald Carter, 2014-07-22 In this book Michael McCarthy and Ronald Carter describe the discursive properties of language and demonstrate what insights this approach can offer to the student and teacher of language. The authors examine the relationship between complete texts both spoken and written and the social and cultural contexts in which they function. They argue that the functions of language are often best understood in a discursive environment and that exploring language in context compels us to revise commonly held understandings about the forms and meanings of language. In so doing the authors argue the need for language teachers, syllabus planners and curriculum organisers to give greater attention to language as discourse.

Exploring Classroom Discourse

Steve Walsh, 2011-03-08. Routledge. *Introductions to Applied Linguistics* consists of introductory level textbooks covering the core topics in Applied Linguistics designed for those entering postgraduate studies and language professionals returning to academic study. The books take an innovative practice to theory approach with a back to front structure which takes the reader from real life problems and issues in the field then enters into a discussion of intervention and how to engage with these concerns. The final section concludes by tying the practical issues to theoretical foundations. Additional features include tasks with commentaries, a glossary of key terms and an annotated further reading section. This book looks particularly at the relationship between language interaction and learning. Providing a comprehensive account of current perspectives on classroom discourse, the book aims to promote a fuller understanding of interaction regarded as being central to effective teaching and introduces the concept of classroom interactional competence (CIC). The case is made in this book for a need not only to describe classroom discourse but to ensure that teachers and learners develop the kind of interactional competence which will result in more engaged dynamic classrooms where learners are actively involved in the learning process. This approach makes an invaluable resource for language teachers as well as students of language and education and language acquisition within the field of applied linguistics.

The articles are comprehensive, ranging from the theoretical to the highly applied. Practical applications include language teaching, literary stylistics and forensic linguistics, with examples taken from literature and language classrooms, telephone conversations, disputed witness statements and corpora of spoken English.

Language for Teaching Purposes. Emma Riordan, 2018-03-15. This book's innovative approach proposes Language for Teaching Purposes as a distinct field of enquiry and practice within Language for Specific Purposes. It uses robust theoretical and empirical evidence to demonstrate the specificity of language used by teachers teaching language and the complex decisions teachers make around language choice and use in language classrooms. These complexities are shown to affect Non-native Speaker Language Teachers in particular so that their language needs must be
