Record ,1901 Indexes the world s zoological and animal science literature covering all research from biochemistry to veterinary medicine The database provides a collection of references from over 4 500 international serial publications plus books meetings reviews and other no serial literature from over 100 countries It is the oldest continuing database of animal biology indexing literature published from 1864 to the present Zoological Record has long been recognized as the unofficial register for taxonomy and systematics but other topics in animal biology are also covered *Palaeoseismology* Klaus Reicherter,Alessandro M. Michetti,Pablo Gabriel Silva,2009 Given the tremendous toll in human lives and attendant economic losses it is appropriate that scientists are working hard to understand better earthquakes with the aim of forecasting and ultimately predicting them In the last decades increasing attention has been paid to the coseismic effects on the natural environment creating a solid base of empirical data for the estimation of source parameters of strong earthquakes based on geological observations The recently introduced INQUA scale Environmental Seismic Intensity ESI 2007 Scale of macroseismic intensity clearly shows how the systematic study of earthquake surface faulting coseismic liquefaction tsunami deposits and other primary and secondary ground effects can be integrated with traditional seismological and tectonic information to provide a better understanding of the seismicity level of an area and the associated hazards At the moment this is the only scientific means of equating the seismic records to the seismic cycle time spans extending the seismic catalogues even to tens of thousands of years improving future seismic hazard analyses This Special Publication covers some of the latest multidisciplinary work undertaken to achieve that aim Eighteen papers from research groups from all continents address a wide range of topics related both to palaeoseismological studies and assessment of macroseismic intensity based only on the natural phenomena associated with an earthquake *Zoological Record* ,1896 Zoological Record is published annually in separate sections The first of these is Comprehensive Zoology followed by sections recording a year s literature relating to a Phylum or Class of the Animal Kingdom The final section contains the new genera and subgenera indexed in the volume Each section of a volume lists the sections of that volume *The Shipley Collection of Scientific Papers* ,1925 *The Record of Zoological Literature* ,1899
