Construction Materials Manual Manfred Hegger, Volker Auch-Schwelk, Matthias Fuchs, Thorsten Rosenkranz, 2013-02-12. Until now, the few existing systematic texts on construction materials have primarily been directed at building engineers. An overview for architects which also considers the importance of construction materials in the sensory perception of architecture, including tactile qualities, smell, color, and surface structure, has not been available. With the publication of the Construction Materials Manual, all that has changed. As a basic work aimed equally at the questions and perspectives of architects and building engineers, it will bring together all of the above-mentioned viewpoints. It addresses fundamental questions of sustainability, including life span, environmental impact, and material cycles, while also presenting material innovations. All of the principal conventional and innovative construction materials are comprehensively documented with attention to their production, manufacture, fabrication, treatment, surfaces, connections, and characteristics. International examples help to illustrate their use in architecture, where a building's appearance is often defined by a single material. Thus, the Construction Materials Manual will support the daily work of architects and engineers in the choice of construction materials in a comprehensive and at the same time vivid and stimulating manner.

Design of Wood Structures- ASD/LRFD, Eighth Edition Donald E. Breyer, Kelly Cobeen, 2019-09-13. The leading wood design reference, thoroughly revised with the latest codes and data, fully updated to cover the latest techniques and standards. The eighth edition of this comprehensive resource leads you through the complete design of a wood structure following the same sequence used in the actual design construction process. Detailed equations, clear illustrations, and practical design examples are featured throughout the text. This up-to-date edition conforms to both the 2018 International Building Code (IBC) and the 2018 National Design Specification for Wood Construction (NDS). Design of Wood Structures ASD/LRFD Eighth Edition covers Wood buildings and design criteria, Design loads, Behavior of structures under loads and forces, Properties of wood and lumber grades, Structural glued laminated timber, Beam design and wood structural panels, Axial forces and combined loading, Diaphragms and shearwalls, Wood and nailed connections, Bolts, lag bolts, and other connectors, Connection details and hardware, Diaphragm to shearwall anchorage, Requirements for seismically irregular structures, Residential buildings with wood light frames.
