Developing Second-language Skills Kenneth Chastain, 1988 **Developing Second-language Skills** Kenneth Chastain, 1976 *Contemporary ELT Strategies in Engineering Pedagogy* S. Mekala, Geetha R, 2022-03-17 This book explores innovative pedagogical practices and teaching and learning strategies in the engineering curriculum for empowered learning. It highlights the urgency for developing specific skill sets among students that meet the current market recruitment needs. The authors present a detailed framework for fostering a higher level of competence in students especially in their communication skills, their knowledge of media and technology tools and their leadership skills. The book offers examples of new and effective teaching strategies including cognitive, metacognitive and socio-affective strategies which align well with the existing and evolving technical curriculum. The book will be of interest to teachers, students and researchers of education, engineering and higher education. It will also be useful for English language teachers, educators and curriculum developers.

Fundamental Concepts of Language Teaching H. H. Stern, 1983-03-24 Professor Stern puts applied linguistics research into its historical and interdisciplinary perspective. He gives an authoritative survey of past developments worldwide and establishes a set of guidelines for the future. There are six parts: Clearing the Ground, Historical Perspectives, Concepts of Language, Concepts of Society, Concepts of Language Learning and Concepts of Language Teaching. *The Second Time Around* □ *Minimalism and L2 Acquisition* Julia Herschensohn, 2000-02-15 Linking recent advances in theoretical syntax and empirical research in language development, the book claims that second language acquisition is not totally distinct from first language acquisition but rather is a replay, a relearning of language. It argues that Universal Grammar is a template guiding acquisition of L1 while constraining acquisition of L2. Assuming that a syntactic distinction is crucial for language and its acquisition is the division between lexical and functional categories, it argues that the key to L2 as well as L1 acquisition of syntax is the mastery of morphological features and their linking to functional categories. It thus supports the availability of UG to the second language learner and the minimalist claim that cross-linguistic variation is morpho-lexical. Constructionism, the hypothesis of L2A proposed in this account, argues for a period of feature underspecification after loss of the L1 value followed by a progressive building of the L2 value through specific constructions. **Assessing Grammar** James E. Purpura, 2004-11-18 Assessing Grammar provides essential reading for teachers who need to evaluate their students' grammar.

CONTEMPORARY RESEARCH ON LANGUAGE STUDIES Dr. Öznur ATAŞ AKDEMİR, Contemporary Research on Language Studies is a collection of current research and review papers on language teaching/learning studies. The book compiles research and review studies on language testing, vocabulary teaching, authentic materials in ELT, L2 writing, distance learning, teaching practices and so on. MALL Shanlax Publications is proud of presenting state-of-the-art research on language studies. **The Foreign Language Educator in Society** Timothy G. Reagan, Terry A.
