Ramola,2015-03-01 One of the major issues this book examines is what the African experience and identity have contributed to the debate on citizenship in the era of globalisation The volume presents case studies of different African contexts illustrating the gendered aspects of citizenship as experienced by African men and women Citizenship carries manifold gendered aspects and given the distinct gender roles and responsibilities globalisation affects citizenship in different ways It further examines new forms of citizenship emerging from the current era dominated by a neoliberal focus The book is not exclusive in terms of theorisation but its focus on African contexts with an in depth analysis taking into consideration local culture and practices and their implications for citizenship provides a good foundation for further scholarly work on gender and citizenship in Africa Diversity of Methodological Approaches in Social Sciences Inna Lyubareva,Roger

Waldeck,2023-09-01 As with many rapidly evolving areas research on pluralism in media and information makes use of appropriate interdisciplinary approaches that consider diverse and interdependent factors These considerations include new economic constraints journalistic production networked technologies online social interactions new forms of discourse consumer preferences and practices and the specificities of information markets This book presents and assesses several methodological approaches that have proven to be valuable in the study of transformations in media and information Some are well known in social sciences e g qualitative analysis by interviews whereas others come from different disciplines and remain rare and original e g agent based modeling By focusing on various dimensions of the media and information pluralism this book pulls together methods based on network analysis agent based modeling and sociosemiotics as well as qualitative and legal approaches Each of the five chapters introduces a specific method and its relevance for the analysis of a particular research question *Nairobi Today* Helene Charton-Bigot,Deyssi Rodriguez-Torres,2010-10-25 Despite being a large capital

city in Africa in terms of size and its regional role Nairobi is an unrecognised entity For the majority of its inhabitants the capital of Kenya is a transit point rather than a dwelling place Since its origins Nairobi has been a city of migrants more predisposed to their rural roots than to their current city status It is a non conforming town which conceals its urbanity more than it claims it and whose identity remains evasive Nairobi presents itself as a mosaic of residential areas which bring to mind the citys history The racial segregation that stratified the development of the colonial city has today disappeared but it

has given way to a form of social segregation. One must therefore not seek a unique identity in Nairobi but rather several identities those of different communities that comprise the city and whose dynamics are seen at village and residential estate level. However Nairobi is also a city that is contradictory. This East African capital city is often associated with slums and crime and their increase and growth stigmatises the failure of urban policies. Therefore it is at these cracks and fringes of the city that we should seek out the identities and dynamics that have shaped the city for a century. Nairobi is a fragmented city that can be understood in steps. The 13 contributory articles in Nairobi Today thus reveal the city. This multidisciplinary collective work invites us to gain entry into certain areas of the city to visit its communities and to familiarise ourselves with its formal and informal institutions. This is a requirement in order to fully understand what makes Nairobi what it is today.

Political, Social, Religious and Economic Challenges in the Middle East and North Africa Flavia Cortelezzi, Alessandro Ferrari, Jinan Limam, 2025-12-23. A decade after the Arab springs the book aims to provide a concise perspective on the political, social and economic challenges of the southern shore of the Mediterranean a decade after the Arab springs. The volume both from a sociolegal and economic perspective aims to offer readers an analytical and up to date picture of the transformations in several particularly significant countries in the area under consideration. The volume thus covers the entire north African and near Eastern coastal belt from Morocco to Lebanon and extends its focus into the Gulf. In particular keeping in the background the Agenda 2020-2030 the book explores on the one side the role of the religious factor in the transformation of the constitutional orders and on the other the perspectives of economies of the MENA region in the decade that followed the Arab springs. In a different way the Arab springs were characterized from a constitutional point of view by the attempt at a different relationship between political power and religion. This new arrangement particularly evident in the Tunisian Constitution but not absent in other contemporary experiences was associated with favorable and expanding economic prospects. The book questions the relevance of this reading and how economic and political factors affected subsequent transformations. The situation of each country is individual in that it differs depending on many factors starting with historical and geographical factors that have profoundly influenced social, political and economic structures. What is to be expected for the MENA region in the light of Agenda 2020-2030? Which are the major opportunities for growth and reform and which are the main risks? By adopting a multidisciplinary approach this book will offer a comprehensive picture of the main political and economic challenges for the MENA region.

Recueil bibliographique en Sciences humaines et sociales Serigne Magaye Cissé, 2013-10-04. Pour rédiger une thèse ou un mémoire ou un ouvrage un long travail de recherche est nécessaire pour trouver la littérature qui fait le point sur les grandes questions qui encadrent un thème de recherche. Par ailleurs aujourd'hui une recherche en sociologie nécessite de regarder au-delà des frontières disciplinaires anthropologie, sciences politiques, géographie etc. L'auteur propose donc ce guide pratique qui recense et regroupe 378 auteurs et quelques milliers d'ouvrages rédigés en langue française et qui couvrent tous les domaines et champs de la sociologie. Nul doute que ce

recueil exhaustif clair et double entr e par auteur ou mati re deviendra un outil de travail pr cieux aux chercheurs et tudians
