Digital Forensics For Handheld Devices 1st Edition By Doherty Eamon P 2012 Hardcover:

Digital Forensics for Handheld Devices Eamon P. Doherty, 2012-08-17 Approximately 80 percent of the world's population now owns a cell phone which can hold evidence or contain logs about communications concerning a crime. Cameras, PDAs, and GPS devices can also contain information related to corporate policy infractions and crimes. Aimed to prepare investigators in the public and private sectors. **Digital Forensics Thoughts on Teaching Desktop Computer and IPAD Forensics** Eamon P. Doherty, Ph.D., 2016-02-09 This book discusses IPAD and desktop computer forensics and some of the tools that are used in order to identify, preserve, analyze, and report on digital evidence. It also discusses some of the academics such as language arts, mathematics, and science that should be encouraged since middle school so that future computer examiners will have an easier time with critical thinking, analysis, and report writing. This book also discusses some thoughts about the subject from students. Building a digital forensic resume is also explored. Some technical topics such as MAC addressing, forensic imaging, IP spoofing, reverse look ups, GPS metadata, write blockers, and examination machines are touched upon. Some paperwork and procedural items such as chain of custody, test plan, and the Frye Test are also discussed. The book is written in any easy to understand language that has something of interest for everyone. *Eforensics and Signal Intelligence for Everyone* Eamon P. Doherty, 2006-12-12 This book discusses the process of investigating and analyzing electronic equipment, detecting devices, wireless signals, and the prosecution and prevention of high tech crime. The coauthors are from private industry and academia and really provide a wide variety of perspectives on the detection of electronic eavesdropping devices, wiretaps, various electronic signals, and the collection and examination of information from laptops, desktop computers, and PDAs. Kenneth Bruno does an excellent job teaching the reader about all the equipment used in electronic eavesdropping detection. We also introduce the reader to various pieces of electronic equipment used to detect and identify explosives, biochemical weapons, as well as historic unexploded ordinance. The reader is also introduced to the legal system by Mr. Joel Liebesfeld who does corporate investigations and is often employed by clients who are in the legal profession or insurance industry. Mr. Joel Liebesfeld and Dr. Doherty discuss the process of becoming an expert witness who may testify to what was found using scientific methods in combination with electronic signal detection or computer forensic equipment. We hope that the readership of the book will include high school students considering a career in private industry, law enforcement, intelligence agencies, or the military. A background in electronics, math, and computer science is helpful but not necessary in reading this book. Lockard's Principle of Exchange specifies that two objects or people that come in contact with each other will change. We hope that this book changes you by increasing your understanding of electronic devices, investigation, and the justice system. **Eforensics and Investigations for Everyone** Eamon P. Doherty, Joel Liebesfeld, 2007-07-10 This book discusses a variety of topics such as cell phone seizure and examination, electrical fire investigation, potential vulnerabilities when using historic electrical devices, interpersonal conduct in the Middle East, Russia,

and the USA intellectual property theft spy cases and various motivations for crime in a manner that everyone can understand We also discuss various test equipment and software used for collecting evidence from both physical evidence and invisible radio frequency artifacts We also discuss electronic equipment that is used to destroy various documents as well as both human and automated processes used to reconstruct small shreds of paper We discuss real cases regarding document reconstruction such as the American Embassy in Iran and the recently discovered East German secret police Stasi shredded records We also discuss the Hanssen spying case using a PDA and low tech techniques such as the dead drop Lastly Jeff Marsh a brilliant man who became disabled due to an unfortunate accident demonstrates with the help of Dr Doherty various devices such as clocks and mustard jars with concealed purposes that may be used by undercover surveillance professionals or private investigators in a variety of settings once proper approval is given Jeff also discusses recreation and conversation as a means of exercising our intellect and informally learning from other people **An**
