The Digital Coloniality of Power Alexander I. Stingl, 2015-12-16

Trouble is afoot in Digital Culture and Nerdland These are Alexander I Stingl's claims not the engine of freedom and democracy that they once were hailed to be this much is already clear in the wake of the snooping and surveillance crises that broke in recent years Digitalization is but another version of the coloniality of power and being that has been at work for decades and centuries He poses the question whether Digital Age possess the legitimacy that digitalization has claimed His response is critically realistic but he doesn't stop at a critique for criticism's sake Inspired by the ideas of decolonial scholars feminist science studies current biological and neuro cognitive research and sociologists capable of reflection and self criticism Stingl attempts to break the canvas of sociology and show that adding a third and decolonial dimension to the two dimensional sociological imagination is indeed possible He illustrates that it is possible that class rooms free speech on internet and the inequalities in the production and distribution of a new form of social capital digital cultural health care capital can be subjected to a decolonial perspective along a sociological line of inquiry if sociologists allow for relations with other disciplines and scholarship to be integrative conversations The goal of this book is not to offer results or closed arguments but to create instead platforms for thinking further opening new lines of inquiry and to argue that it is not enough to identify problems or to attempt solve the problems with politics or best practice solutions Instead he proposes we must learn to identify and make use of the opportunities that are produced by any problem Stingl's conclusion is in short that a sociology that takes the decolonial challenge and critique seriously can not be a sociological sub discipline or a sociology of a problem but it must be a sociology of opportunities

Afterschool Nancy Vansieleghem, Joris Vlieghe, Pieter Verstraete, 2015-10-22 Tangible tension of omnipresent images in education The intricate relation between images and education is an old issue that can easily be dated back to the rise of Modernity Ever since it has been argued on the one hand that images might assist teachers in educating the new generation but on the other might detract students attention by offering them mere entertainment instead of seriously pursuing essential subject material Today with the omnipresence of screens in our daily life this tension has become all the more tangible Some may even start to wonder whether education traditionally conceived as schooling is still achievable under these conditions The title Afterschool refers to a film by Antonio Campos which depicted these new conditions very accurately In the same way the book articulates in an affirmative manner the role of education in an Afterschool era and also what images could signify in such an era both for educators and educational researchers All essays included in this book in one way or another respond to this process of digitization At the same time they present new and unexpected ways of making use of images in educational practice and research

Identität und Internet: Die Schattenseiten von Kommunikation und Identitätsbildung im Internet

Jan-Christian Hansen, 2015-02-01 Das Internet bestimmt wie kein anderes Medium unseren Alltag und unser Leben. Die Langzeitfolgen sind nicht abschätzbar, dennoch zeigen sich in puncto Kommunikation und Identitätsbildung im Internet erste besorgniserregende Tendenzen, die vor allem auf die Veränderung unserer Kommunikationsart zurückzuführen sind. Wir reden nicht mehr von Angesicht zu Angesicht mit unseren Mitmenschen, sondern wir kommunizieren im Internet vorwiegend durch Schriftsprache miteinander. Diese Ausklammerung der physischen Präsenz aus dem Kommunikationsprozess hat jedoch schwerwiegende Folgen auf die Gesellschaft, unser Zusammenleben und auf unser Ich. Kommunikation und Identität werden im Internet zu beliebig manipulierbaren Größen. Diese Arbeit untersucht die Auswirkungen des Internets als dominantes Kommunikationsmedium sowie deren Einfluss auf unsere Identität mit Hilfe von Jürgen Habermas' Theorie des kommunikativen Handelns und versucht Antworten darauf zu geben, wie wir die nötige Internet- und Identitätskompetenz aufbringen können, ohne unser Ich, unsere Identität und die lebensnotwendige Kommunikation mit unseren Mitmenschen aufzugeben.

Liturgie - Körper - Medien

Alexander Deeg, Christian Lehnert, 2019-08-31 Die Digitalisierung verändert Wahrnehmungsweisen, grundlegend Algorithmen, Datenbanken und social communities bestimmen westliche Kulturen in einer elementaren Weise wie Klima und Geschichte. Wie das aber auch Frömmigkeit und liturgische Formen verändert ist, in unseren Kirchen kaum bedacht. Elementare Fragen drängen heraus: Welche Bedeutung hat der menschliche Körper für religiöse Erfahrungen und in wie weit sind Sakrament und gelebter Leib Christi digitalisierbar? Was bedeuten virtuelle Sakralräume? Ist der Gottesdienst selbst ein Medium oder ist er Fest einer Gottesgegenwart, die alle Möglichkeiten menschlicher Kommunikation bersteigt? Dieser Band nimmt die Fragen auf, wissend, wie groß und unerschlossen das Forschungsland ist. Die Beiträge folgen Gottesdienstgestaltungen im digitalen Raum, beleuchten den Zusammenhang von Körper, Medialität und Erfahrung, suchen theologische Wegmarken und kulturwissenschaftliche Vergleichspunkte. Mit Beiträgen von Kristina Fiedler, Christian Grethlein, Ferenc Herzig, Kristin Merle, Volkmars Mähle, Dirk Pilz, Christian Walti und Katharina Wiefel. Jenner, Liturgy Body Media: Challenges for Church Services in Modern Society. The digital world changes how we perceive things in a fundamental way. Algorithms, databases and social communities are defining western cultures. But our churches barely consider how this affects the praxis of piety and liturgical forms. Elementary questions rise up, such as: what significance does the human body have for religious experience? To what extent are sacrament and the living body of Christ digitizable? What do virtual sacred spaces signify? Is the service itself one medium or rather the celebration of God's presence that is beyond all possibilities of human communication? This volume takes up questions, recognising that the field of research is enormous and largely unexplored. The contributors observe liturgies in the digital world, take a close look on the relations between body, mediality and experience and look for points of reference in Theology as well as in Cultural studies.
