for Truth in the Sciences and a subsequent development of the ideas contained in it *Meditations on First Philosophy* first published in 1641 Includes a selected bibliography Annotation copyrighted by Book News Inc Portland OR **Discourse on Method** Rene Descartes, Marciano Guerrero, 2014-01-27 As he writes in his *Discourse on Method* having made some stunning discoveries he felt that at age 22 it was too premature for him to reveal his findings Instead he traveled joined the army for a brief time and saw some battles In 1637 Descartes published *Optics Meteorology and Geometry* a collection of essays The preface to the collection is titled *Discourse on the Method of Rightly Conducting the Reason and Seeking Truth in the Sciences* Descartes *Discourse* alters the course of philosophy by starting first with a proof of the existence of the self *cogito ergo sum* and subsequently deducing from it the existence and nature of God That is to say he offers a radical modern account not only of the physical world but also of the fauna and flora Written in plain straight forward French he made his method accessible not only to the learned but all who wanted to pursue truth in knowledge *A Discourse on the Method* René Descartes, 2006-01-12 I concluded that I was a substance whose whole essence or nature resides only in thinking and which in order to exist has no need of place and is not dependent on any material thing Descartes's *A Discourse on the Method of Correctly Conducting One's Reason and Seeking Truth in the Sciences* marks a watershed in European thought in it the author provides an informal intellectual autobiography in the vernacular for a non specialist readership sweeps away all previous philosophical traditions and sets out in brief his radical new philosophy which begins with a proof of the existence of the self the famous *cogito ergo sum* next deduces from it the existence and nature of God and ends by offering a radical new account of the physical world and of human and animal nature This new translation is accompanied by a substantial introductory essay which draws on Descartes's correspondence to examine his motivation and the impact of his great work on his contemporaries Detailed notes explain his philosophical terminology and ideas ABOUT THE SERIES For over 100 years Oxford World's Classics has made available the widest range of literature from around the globe Each affordable volume reflects Oxford's commitment to scholarship providing the most accurate text plus a wealth of other valuable features including expert introductions by leading authorities helpful notes to clarify the text up to date bibliographies for further study and much more **A Discourse on Method** Rene Descartes, 2001-01 **Discourse on Method and Meditations on First Philosophy** Rene Descartes, 2016-09-06 Several of Descartes's most groundbreaking essays and treatises are contained in this superb unabridged edition Written by Rene Descartes in the 17th century and counted among the first great philosophic works of Enlightenment era these papers contain the philosopher's thoughts on the nature physical objects presence and being Descartes describes a series of vivid dreams which for their realism leave him in doubt as to whether he does indeed possess a body or whether it is merely an illusion Descartes reflects upon the nature of dreams and wonders whether their strangeness is not a consequence of God playing a trick with his mind Discounting God as the culprit Descartes instead places responsibility of the illusion of reality at the feet of a malignant demon The second

meditation sees Descartes express doubt as to whether any of his theorising can be proven true Can the mind be proven to be truly separate and distinct from the body or is it actually true that the two are purposely interlinked and co dependent Later meditations expound further on the themes of truth and the divine and of the nature of the physical world around the human body Descartes devotes further pages of explanation to the mind and the body discussing his perception of each The translations present in this edition were composed by the Scottish poet and scholar of philosophy John Vietch whose academic career at The University of St Andrews in Fife provided a firm grounding in the philosophic disciplines
