Short Term Memory STM modeling in the context of 2 dimensional object shape reconstruction from visually examined memorized instances A third model assesses the subjective motor learning skill in driving from erroneous motor actions Other models introduce a novel strategy of designing a two layered deep Long Short Term Memory LSTM classifier network and also deal with cognitive load assessment in motor learning tasks associated with driving The book ends with concluding remarks based on principles and experimental results acquired in previous chapters Examines the scope of computational models of memory and learning with special emphasis on classification of memory tasks by deep learning based models Proposes two algorithms of type 2 fuzzy reasoning Interval Type 2 fuzzy reasoning IT2FR and General Type 2 Fuzzy Sets GT2FS Considers three classes of cognitive loads in the motor learning tasks for driving learners Cognitive Modeling of Human Memory and Learning A Non invasive Brain Computer Interfacing Approach will appeal to researchers in cognitive neuro science and human brain computer interfaces It is also beneficial to graduate students of computer science electrical electronic engineering

Educating in the Spirit Eric J. Kyle, 2019-05-16 This book is an attempt to address two struggles for theistic educators e g those who approach their educational vocation from a religious perspective whether they are working in secular or faith based institutions The first struggle is that while numerous guidelines on teaching excellence have been compiled the resulting checklists can contain more than a hundred criteria to consider This book therefore identifies the evidence based guidelines that are likely to have the highest impact on student achievement thereby empowering educators to focus their efforts in more substantial ways The second struggle is related to the lack of resources which can help educators to view and approach their vocation from a theistic perspective While there are texts that discuss the relationship of spirituality and or theology to education few to date have sought to bring evidence based educational literature into dialogue with the western Christian tradition and thereby develop a bottom up theology of education This book addresses this historical and theological gap Overall this book is therefore intended to not only provide theistic educators with high impact guidelines that can significantly improve the quality of education in their school systems but it also strives to do so from a thoroughly theistic perspective
