The seventh edition of this popular text offers comprehensive coverage and a balanced approach of all of the varying theories and practices in the field: educational, medical, and psychological, incorporating assessment, definition, characteristics, and strategies all to help readers develop their own personal perspective. Throughout the text, best practices have been identified through thorough research and practical examples. Revised to include the latest research and recent developments, the seventh edition reflects the latest trends in the field of learning disabilities. The authors have included new and expanded coverage of cultural diversity, responsiveness to intervention techniques for identifying students with learning disabilities, expanded coverage of effective practices to prevent and remediate reading difficulties, effective assessment strategies, and teaching practices in the academic areas based on recent research. A new chapter on ADHD, a focus on how to teach and manage students with learning disabilities, and information on the 2004 reauthorization of IDEA and the 2006 Code of Federal Regulations. Combining Classwide Peer Tutoring with Constant Time Delay Procedures

Trudie Hughes, 2010-02-15 This study examined the efficiency of combining classwide peer tutoring and constant time delay (CTD) on academic performance of 3 students with learning disabilities and 16 students without disabilities enrolled in an inclusive sixth grade Language Arts class. Treatment integrity checklists were used to measure the extent to which the tutors with learning disabilities used the CTD procedure correctly and the tutees' correct performance on the skills being taught. A multiple probe design across behaviors replicated across students was used. The results indicated that students with learning disabilities could reliably implement the peer tutoring CTD procedures with a high degree of treatment integrity. Both students with learning disabilities and without disabilities accurately and fluently learned 15 targeted vocabulary words. Students with learning disabilities acquired the skills that were taught in a short amount of time with minimal errors and maintained a high level of skill acquisition over a 7 week period and both students and teachers expressed a high level of
