Buddhist approach to responsible consumption and sustainable development Thich Duc Thien, Thich Nhat Tu, 2019-04-16 EDITORS INTRODUCTION BACKGROUND This is a great academic solace to see the Volume on Buddhist Approach to Responsible Consumption and Sustainable Development which covers Sub Theme Five of UNDV 2019 Academic Conference REVIEW OF CONTENTS The World of Today is suffering from the crisis of consumerism The first paper on a Buddhist Perspective on Overconsumption and Its Negative Effects towards Society and Environment deals with it specifically in the reference of consumption beyond requirements which is generally termed as overconsumption

Such human tendency leads to negative impact on the entire force of nature and the environment. How the Buddhist principles guide us to live a better life where there is least effect on the environment and society is well explained in this paper. The second paper in this volume entitled *Attaining a Sustainable Society through the Teachings of the Khandhaka of the Theravada Vinaya Pitaka* is a vivid example of the benefits which one can derive from our ancient Pali literature. While studying the Theravada Vinaya Pitaka, the author explores the specific words of the Buddha in the Khandhaka which hint at the possibility of sustainability and development going together without harming other societal components. Though the Vinaya being a Pitaka for monastics, it still is highly useful for the laity as well. The paper *Buddhist Ethics in the Establishments of Green Tourism* is a unique academic contribution. Here the writer states that the Buddha's life and principles make us learn a lot as how green methods must be applied in our day to day life. The damage being caused by the genre called DEVELOPMENT needs to be controlled and for this the words of Master exhibit his proximity to protect nature, humanity and the world order.

Cross-Cultural Management Mai Nguyen-Phuong-Mai, 2019-09-02. *Cross Cultural Management With Insights from Brain Science* explores a broad range of topics on the impact of culture in international business and vice versa and the impact of businesses and individuals in shaping a culture. It provides critical and in depth information on globalization, global leadership, cross cultural marketing and cross cultural negotiation. It also discusses many other topics that are not typically found in the mainstream management textbooks such as diversity management, bias management, cross cultural motivation strategies and change management. While most literature in the field is dominated by the static paradigm that is culture is fixed, nation equates to culture and values are binary, this book takes a different approach. It regards national values as a first best guess and balances it with an introduction of the dynamic paradigm. This school of thought posits that culture is not static, context is the software of the mind, opposing values coexist, change is constant and individuals can develop a multicultural mind. A unique feature of this book is the contribution of an interdisciplinary approach. It is the first textbook of cross cultural management that incorporates latest findings from the emerging discipline of cultural neuroscience and evolutionary biology in the discussion. Such a holistic approach is meant to help readers gain a deeper and broader understanding of the subjects.
