interaction analysis A process of Hervorhebungspraktik practice of highlighting was observed which gradually brought musical elements out of their temporal context and into collective perception allowing both atmospheric interaction with content and the growth of professional vision A process of deconstruction and reintegration takes place as musical elements now present in collective consciousness withdraw back into the piece as a whole This necessitates an educational approach emphasizing not only the elements themselves but the relationships between them The realms of edusemiotics and phenomenology give us a pragmatic way in both a Deweyan and a Peircean sense to approach learning in music making that goes beyond the idea of co constructivism as content with agency teacher and student participate in coordinative interaction

Aimee Beaulieu Schmidt is a native Texan with teaching experience in American and German public education As a band director and orchestral musician she has helped build music education programs on two continents She lives with her husband and two daughters near Frankfurt Germany Her research focuses on musical coordination edusemiotics and qualitative video analysis
