This book elaborates on the modern experience and prospects and the development of recommendations for sustainable development of the agrarian economy based on digital technologies and smart innovations for the provision of food security. This book dwells on the global and regional challenges for food security and answers to them through the sustainable development of the agrarian economy. The book also studies the international experience of sustainable development of the agrarian economy on the basis of digital technologies and advantages for food security. Sustainable development of the agrarian economy with the use of digital technologies as the foundation of food security of Central Asia is considered. The prospects for provision of food security through the use of smart innovations for the sustainable development of the agrarian economy are outlined. A set of applied recommendations for raising the effectiveness of the use of smart innovations for the sustainable development of the agrarian economy is proposed.

Handbook of Research on Enhancing Teacher Education with Advanced Instructional Technologies Ololube, Nwachukwu Prince, 2015-07-17 Before today's teachers are ready to instruct the intellectual leaders of tomorrow they must first be trained themselves. Information and communication technology can greatly increase the effectiveness of this training and also aid teachers as they seek to bring the latest technological advancements into their own classrooms. The Handbook of Research on Enhancing Teacher Education with Advanced Instructional Technologies explains the need to bring technology to the forefront of teacher training. With an emphasis on how information and communication technology can provide richer learning outcomes, this book is an essential reference source for researchers, academics, professionals, students, and technology developers in various disciplines.

AMST'05 Advanced Manufacturing Systems and Technology Elso Kuljanic, 2007-03-23 Manufacturing a product is not difficult; the difficulty consists in manufacturing a product of high quality at a low cost and rapidly. Drastic technological advances are changing global markets very rapidly. In such conditions, the ability to compete successfully must be based on innovative ideas and new products which have to be of high quality yet low in price. One way to achieve these objectives would be through massive investments in research of computer-based technology and by applying the approaches presented in this book. The First International Conference on Advanced Manufacturing Systems and Technology (AMST87) was held in Opatija, Croatia, in October 1987. The Second International Conference on Advanced Manufacturing Systems and Technology (AMSV90) was held in Trento, Italy, in June 1990. The Third, Fourth, Fifth, and Sixth Conferences on Advanced Manufacturing Systems and Technology were all held in Udine, Italy, as follows: AMST93 in April 1993, AMST96 in September
