Migration Strategies of Birds of Prey in Western Palearctic Michele Panuccio,Ugo Mellone,Nicolantonio

Agostini,2021-07-28 Given their roles in the ecosystem raptors are widely considered the flagship or umbrella species among birds Most species undertake a seasonal journey that is impressive because of the length and the imposing natural barriers such as deserts and seas that they fly over The migration of birds of prey has unique characteristics in the animal world because of their morphology and flight style The flying path of Afro Palearctic migrants between breeding and wintering grounds is determined by several factors such as morphology of the birds geography behavioural adaptations The book analyses the migration patterns of raptors along the Afro Palearctic migratory system and summarizes the recent research on these top predator species Behavioural adaptations such as the importance of social interactions and the modulation of the different flight styles as well as ecological interactions with the encountered environment and weather conditions en route are described in the book Moreover the impact of climate change on the migratory behaviour and key conservation issues are discussed The book provides an overview of the migratory characteristics and flyway patterns of all European raptors species and also some Asian ones These chapters have been written by some of the most important raptor specialists giving a complete picture of the different migration strategies on the basis of both traditional methods and new technologies

Zooarchaeology and Modern Human Origins Jamie L. Clark,John D. Speth,2013-07-11 Recent genetic data showing that Neanderthals interbred with modern humans have made it clear that deeper insight into the behavioral differences between these populations will be critical to understanding the rapid spread of modern humans and the demise of the Neanderthals This volume which brings together scholars who have worked with faunal assemblages from Europe the Near East and Africa makes an important contribution to our broader understanding of Neanderthal extinction and modern human origins through its focus on variability in human hunting behavior between 70 25 000 years ago a critical period in the later evolution of our species **The Wryneck** Gerard Gorman,2022-02-01 This book considers the natural history and cultural symbolism of a most unusual woodpecker a species that neither excavates nest holes in trees nor bores into wood to find insect prey The Wryneck is best renowned for performing a twisting writhing head and neck display when threatened but this

ground breaking work reveals many more secrets of its behaviour and evolution Detailed information is presented on the species origins taxonomy anatomy appearance moult calls distribution conservation status habitats movements breeding diet and relationships along with a chapter on its closest relative the Red throated Wryneck The text is richly illustrated throughout with high quality photographs as well as sound spectrograms The author augments his many hours watching Wrynecks with comprehensive literature research creating what is surely the definitive volume on the species This all encompassing and engaging account has been written for a wide audience whether professional ornithologist citizen scientist amateur birder woodpecker aficionado or simply someone who wishes to learn more about this curious and remarkable bird
