Building A Body Of Knowledge In Construction Project Delivery, Procurement And Contracting Giovanni C Migliaccio,Pramen P Shrestha,2022-12-16 This book aims to consolidate structure and articulate collective knowledge on construction project delivery procurement and contracting so that it can serve as a gateway to the contiguous topics of construction project delivery In addition to supporting the education of student researchers as well as broadening and deepening the knowledge of practitioners the book is also intended to serve as a foundation for future education and as a reference book Academicians can use it to benchmark and support their research and also as a textbook for an undergraduate or graduate course on the topics of project delivery procurement and contracting *Construction Dispute Research Expanded* Sai On Cheung,2021-08-30 As an expansion of the book *Construction Dispute Research* published in 2014 this book presents further contributions and breaks into three new research foci in construction dispute studies Part A discusses the conceptualization and minimization of biases in construction dispute decisions Part B examines other impediments against settlement such as inequity power asymmetry and loss aversion Part C focuses on reality check of construction dispute negotiation conditions such as market competition interdependence of contracting parties and dispute avoidance function of construction incentivization This book showcases new ideas in construction dispute research It offers research studies that are theory rich and conducted with robust methodologies The research implications are practical and implementable **Blockchain of Things and Deep Learning Applications in Construction** Faris Elghaish,Farzad Pour Rahimian,Tara Brooks,Nashwan Dawood,Sepehr Abrishami,2022-07-09 This book significantly contributes the digital transformation of construction The book explores the capabilities of deep learning to provide smart solutions for the construction industry particularly in areas of managing equipment design optimization energy optimization and detect cracks for buildings and highways It provides conceptual solutions but also practical techniques A new deep learning CNN based

highway cracks detection is demonstrated and its usefulness is tested The resulting deep learning CNN model will enable users to scan long distance of highway and detect types of cracks accurately in a very short time compared to traditional approaches The book explores the integration of IoT and blockchain to provide practical solutions to tackle existing challenges like the endemic fragmentation in supply chain the need for monitoring construction projects remotely and tracking equipment on the site The Blockchain of Things BCoT concept has been introduced to exploit the advantages of IoT and blockchain and different applications were developed based on this integration in leading industries such as shared economy and health care Workable potential use cases to exploit successful utilization of BCoT for the construction industry are explored in the book s chapters This book will appeal to researchers in providing a comprehensive review of related literature on blockchain the IoT and construction identify gaps and offer a springboard for future research Construction practitioners research and development institutes and policy makers will also benefit from its usefulness as a reference book and collection of case studies on the application of these new approaches in construction

The Sustainable Built Environment Begum Sertyesilisik,Ahmed Al Shamma'a,2015-11-27 The text adopts an interdisciplinary approach to address the huge challenges in creating a sustainable built environment In a broad survey of critical issues it assesses procurement cost modelling and management sustainable buildings low and zero carbon technologies sustainability in utilities and the law

Construction Dispute Research Sai On Cheung,2014-07-08 There are three specific purposes of Construction Dispute Research First this volume aims to summarise studies on construction dispute Second apart from the theoretical constructs where appropriate empirical tests are also included This approach serves to go beyond the commonly used anecdotal approach for the subject matters Third it is the sincere hope of the authors that this book will help shaping research agenda of construction dispute The studies are mostly framed from a management perspective drawing on methods and concepts in contract law economics psychology and management science The book has twenty chapters that are arranged in four parts covering conceptualisation avoidance negotiation and mediation Part 1 is devoted for dispute conceptualisation A building is only as strong as its foundation Thus it is no better start to study construction dispute by conceptualisation The theme of Part 2 is dispute avoidance The conventional wisdom of prevention is better than cure seems can be applied to all problems As far as construction dispute is concerned equitable risk allocation and trust are the two most commonly accepted avoidance strategies Part 3 focuses on negotiation that is the gateway to resolution as almost all disputes are negotiated first before the service of other mechanisms Negotiation is sometimes described as an art because settlement may not be obtained solely from legal and rational approaches Part 3 discusses the behavioral dimensions of construction dispute negotiation Part 4 deals with Mediation a form of assisted negotiation Specially the skill of the mediators in facilitating settlement the interrelationships among dispute sources mediator tactics and mediation outcomes are explored The studies presented in Construction Dispute Research collectively demonstrate holistic approach in dispute management Each chapter can be read

as a study on its own Practitioners will find the book a handy reference in dispute management and resolution Students would find the book useful in explaining in details the causes of dispute the processes to resolve them The research design and empirical approaches are particularly useful to students in construction management architectural surveying and civil engineering programs
