ASCO–CAP HER2 Test Guideline Recommendations

Summary of Guideline 2007 and 2013 Recommendations

Topic	2007 Recommendation	2013 Recommendation
Specimens to be tested	All primary breast cancer specimens and metastases should have at least one HER2 test performed	All newly diagnosed patients with breast cancer must have a HER2 test performed. Patients who then develop metastatic disease must have a HER2 test performed in a metastatic site, if tissue sample is available.
Optimal algorithm for HER2 testing	Positive for HER2 is either IHC HER2 3+ (defined as uniform intense membrane staining of > 30% of invasive tumor cells) or FISH amplified (ratio of *HER2* to CEP17 of > 2.2 or average *HER2* gene copy number > six signals/nucleus for those test systems without an internal control probe	Must report **HER2 test result as positive for HER2 if:** [AP] • IHC 3+ based on circumferential membrane staining that is complete, intense [LA] • ISH positive based on: Single-probe average *HER2* copy number ≥6.0 signals/cell; [LA] Dual-probe *HER2*/CEP17 ratio ≥2.0; [LA] with an average *HER2* copy number ≥4.0 signals/cell Dual-probe *HER2*/CEP17 ratio ≥2.0; [LA] with an average *HER2* copy number <4.0 signals/cell* Dual-probe *HER2*/CEP17 ratio < 2.0; [LA] with an average *HER2* copy number ≥6.0 signals/cell
	Equivocal for HER2 is defined as: IHC 2+ or FISH *HER2*/CEP17 ratio of 1.8-2.2 or average *HER2* gene copy number 4-6 *HER2* signals/nucleus for test systems without an internal control probe	Must report **HER2 test result as equivocal** and order reflex test (same specimen using the alternative test) **or** new test (new specimen, if available, using same or alternative test) if: [AP] • IHC 2+ based on circumferential membrane staining that is incomplete and/or weak/moderate* and within >10% of the invasive tumor cells;* or complete and circumferential membrane staining that is intense and within ≤10% of the invasive tumor cells* • ISH equivocal based on: Single-probe ISH average *HER2* copy number ≥4.0 and <6.0 signals/cell*,[F] Dual-probe *HER2*/CEP17 ratio <2.0 with an average *HER2* copy number ≥4.0 and <6.0 signals/cell*,[F]

scientists doctors and technical staffs who are directly involved in biobanking operations scientists in other disciplines that heavily rely on biobanking such as genomics or proteomics stakeholders and policy makers and of course students for whom biobanking is becoming an important part of the training curriculum So far there has been a lack of major textbooks on biobanking Documentation for biobanking is widely available through numerous publications regulatory documents published by International or Governmental Agencies and sets of recommendations essentially accessible through the Internet However it is difficult to access a single top of the shelf reference that provides at a glance a large coverage of all aspects of human biobanking Fulfilling this need is the main origin of the concept for this back to back publication project To our knowledge there is currently no other publication project with the same breath and scope as this one in the field of biobanking **New Approaches to Classification and Diagnostic Prediction of Breast Cancers** Aleix Prat,Mothaffar Rimawi,2020-06-16 Despite many years of translational research in breast cancer very few new biomarkers have been implemented for clinical use beyond estrogen receptor progesterone receptor and HER2 The main reason is that many promising biomarkers are clinically validated but lack analytical and clinical utility One explanation is that proper validation of the predictive ability of the biomarker in independent datasets and with a pre planned statistical analysis is not always performed Thus there is a need to identify new biomarkers or new ways to subclassify breast cancer patients that are reproducible and easy to implement in the clinical setting but more importantly that improve patient s outcomes **Advances in Surgical Pathology: Breast Cancer** Omar Hameed,Shi Wei,Mohamed Mokhtar Desouki,Heidi Umphrey,2015-04-28 The latest groundbreaking addition to the Advances in Surgical Pathology series Breast Cancer offers a thorough overview of the disease and the most recent data and technologies used in breast cancer surgery and diagnosis Whether you re a new or experienced pathologist or oncologist or prepping for boards or certification this is an irreplaceable volume A Comprehensive Guide to Core Needle Biopsies of the Breast Sandra J.
