On a Global Mission: The Automobiles of General Motors International Volume 3 Louis F. Fourie, 2016-12-29
Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

G. Müller, Heinz C. Schröder, Xiaohong Wang, 2017-02-25. This book describes the discovery of molecules from unexploited extreme marine environments and presents new approaches in marine genomics. It combines the current state of knowledge in marine genomics and advanced natural products chemistry to pursue the sustainable production of novel secondary metabolites, lead compounds as well as pharmacologically active peptides, proteins with antimicrobial, neuroprotective, anti-osteoporotic, anti-protozoan, anti-plasmodial, anti-ageing and immune modulating effects. Further, it employs molecular biology based approaches and advanced chemical techniques to obtain and to select candidate compounds for pre-clinical and clinical studies.

Registry of Toxic Effects of Chemical Substances, 1987. *The Automotive Industry and European Integration* A. J. Jacobs, 2019-08-07. This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU.
