Figure 2. A schematic diagram of the model for the development of the brain. The brain is divided into two main parts: the cerebrum and the cerebellum. The cerebrum is further divided into the left and right hemispheres. The cerebellum is located at the back and bottom of the brain. The diagram shows the flow of information from the environment through the sensory organs to the brain, and then from the brain to the motor organs. The cerebrum is responsible for higher-level functions such as thinking, planning, and decision-making, while the cerebellum is responsible for coordination and balance.
