Atlan The Lost Continent Finally Found:

Atlantis Arysio Santos,2005-06 Thousands of books have already been written on Atlantis since its reality was first disclosed by the great philosopher Plato some two and a half millennia ago Hence one may well wonder whether a new book on the subject is really needed Can anything new actually be said about Atlantis The answer is a most categorical yes After all the riddle of Atlantis has never been satisfactorily solved so far The present book is an attempt by a reputed scientist to scientifically compare and refute perhaps for the first time ever the various existing theories on Atlantis location and reality The author also expounds his own theory which definitively locates Atlantis in Indonesia In his research Prof Santos marries the most recent results and techniques of Modern Science to the sacred and folk lore of all the peoples of the world knitting humanity together in a solution to the riddle of Atlantis that neatly ties together the vast scientific and traditional evidence which was always there but never before seen by other researchers The reader whether a scientist with an open mind or a lay person is led to conclude that Plato could well have been telling the truth after all since the information provided by the great philosopher is so uncannily confirmed by the recent scientific finds of all sorts *Atlantis* Arysio Santos,2011-03-01

The late author Arysio Santos was a highly regarded climatologist geologist and nuclear physicist He was also a scholar of history folklore languages and the occult In this groundbreaking study of Atlantis he draws on all these disciplines as well as ancient maps Plato s dialogues and folkloric narratives to provide the most compelling case yet of the disappearance of an entire civilization Professor Santos demonstrates that Plato s dating of Atlantis s disappearance in 11 600 BP before present precisely corresponds to the catastrophic end of the Pleistocene Ice Age as well as a historic flood event of cataclysmic proportions The rising of the sea level by nearly 500 feet he argues submerged continent sized lands including Atlantis which he connects with the biblical Garden of Eden Provocative chapters cover such topics as the continent s appearance in ancient maps Indonesia as the true site of Eden American interpretations of Atlantis the four rivers of paradise and more giving a clear form to the ghostly outline of this fabled land *Atlantis: The Lost Continent Finally Found* , Present a theory on the location of the lost continent of Atlantis States that Atlantis can be found in the South China Sea Discusses the evidence Atlantis in myths and religion and the civilizing impact of Atlantis on the new and old worlds Offers access to a FAQ section articles awards and reviews and site statistics

Cosmological Constant was needed to explain the existence of Dark energy The cosmological constant is the density of space energy or vacuum energy that appears in the field equation in General Relativity This constant was introduced by Einstein in his theory of General Relativity so that the universe remains static Einstein then discarded or abandoned the cosmological constant when observations showed that the universe is expanding or moving to expand This is the biggest mistake in my life Einstein who once modified the nature of the general theory of relativity felt that he had corrupted his own theory He regretted so much that the addition of the cosmological constant was the biggest mistake of his life Naturally as an ordinary human Einstein is not free from mistakes here we learn that mistakes are a very human nature they can happen to anyone including scientists of Einstein's caliber Likewise in the calculation of the year in the recording of historical years in the archipelago Konstanta or the determination of the calculation of the historical year on the inscription with the number of Saka which has been calculated as Must started in 78 AD is obsolete must be discarded or not used again because it is proven that there are many historical facts that occurred before that year in the archipelago Mistakes or in polite language is Mistakes can happen to anyone including scientists of Einstein's caliber as well as chroniclers in this country that the year 78 AD is the year of the Saka nation of the ancestors of the Archipelago nation that year conquered Raja Salivahana in south India It is not the beginning of the Saka year to calculate the number of years in the Inscription of this early calculation of the Saka year causing our history to be lost before the year 78 AD in fact there is already an advanced civilization in this country and if this is considered to the Khilafan so when do we want to be considered a Primitive nation That means If we have found the numbers Constants or Decisions in the early years of the calculation of the Saka year in the inscriptions we will find a lot of real facts that the History of the Archipelago is more advanced than what is written today The Sumuruping Geni Constant is the determination of the return of the bright light from the fire that once lit the world and the source of that fire has ever occurred and originated in this land History naturally rotates towards the point where it was once passed and that triumph has occurred and will be repeated again with valid provisions or constants so now the time has come for the Sumuruping Geni Constant to occur again in this archipelago The generation of this nation will understand who their true ancestors were that their ancestors were not Primitive did not embrace Animism Dynamics were also the philosophy of their teachings that colored 3/4 of the earth which underlies the birth and growth of 3 teachings on Indian soil INDON SIARY By Santosaba Info eBook pdf WA 62813 2132 9787 <https://wa.me/message/005THVF7RNND01> **ATLANTIS IS INDONESIA FIRST**

one night In the book it is written that in front of the Mainstay Haigelisi strait there is a very large island from there we can go to other islands on the islands surrounded by the ocean that is the kingdom of Atlantis **LEMURIA ATLANTIS**

From the First Rising Sun Charla Jean Morris,2011-08-10 While in medical school which I did not have the privilege of completing once a week we had a small group discussion class called Focus On Problems Each group had a leader a member of the medical school staff or someone closely associated with the school usually an MD or Ph D Our group leader was Dean of the Medical School H David Wilson MD One class period focused on working with patients of different ethnic backgrounds Dr Wilson asked me what were some of the traditions of my tribe in regard to medicine that would be helpful for a doctor to know My reply was that I had been raised like a white that I had grown up learning about various herbal and natural remedies but that I knew nothing about the specific medical traditions ceremonial or secular of my people I had always longed to know of the traditions of my people before that but circumstances of my family history had not allowed it That question in the Focus On Problems class caused that longing to intensify into a sharp pang of longing that would not be satisfied until many years later While in the first two years of medical school as a nontraditional student I was in an environment that encouraged the development of the knowledge of Native American traditions We had Native American speakers that came and elaborated on Native American traditions One area that was lacking was tribal histories but what academics label prehistory I commented to her that when white man came they did all they could to destroy our social and religious fabric so the old traditions were not passed down to most of the remaining members of the tribes Now we know nothing of our old history There is nothing left The white side of my family history is easy to know but not my Cherokee and Choctaw side She replied by saying that yes many of our peoples have lost their old traditions and it is sad Sundaland: Tracing The Cradle of Civilizations Dhani Irwanto,2019-02-22 Sundaland is a bio geographical region of Southeastern Asia which encompasses the Sunda Shelf the part of the Asian continental shelf that was exposed during the Last Ice Age It included the Malay Peninsula on the Asian mainland as well as the large islands of Kalimantan Java and Sumatera and their surrounding islands Sundaland is in the tropics surrounded by oceans and within the Ring of Fire Benefitting from the heavy precipitation volcanic deposits in Sundaland develop into some of the richest forestry and agricultural lands and developed into some of the richest fauna on Earth The vast majority of scholars accept that every living human being is descended from a small group in Africa who then dispersed into the wider world Archaeological and fossil evidence support an early

migration of modern humans left Africa and followed the coastlines of Africa Arabia India and Sundaland After migrating from the semi deserted savannas of Africa man first found a place in Sundaland where food was abundant and it was there that they left hunter gatherer culture and invented farming agriculture trading and civilization which made humanity first flourished All this took place during the Last Glacial period The sea levels continued to rise gradually to peak levels about 5 500 years ago causing land loss on tropical coasts with flat continental shelves Cracks in the earth s crust as the weight of the ice shifted to the seas set off catastrophic events compounded by earthquakes volcano eruptions super waves and floods drowned the coastal cultures and all the flat continental shelves of Southeast Asia and wiped out many populations As the sea rolled in there was a mass migration from the sinking continent Genetic studies show that there has been a sharp decline in the population of the world and population turnovers from Southeast East and South Asia to Europe Near East and the Caucasus beginning at the the end of the Younger Dryas period The Younger Dryas disasters are also documented as legends myths or tales in almost every region on Earth observable with tremendous similarities They are common across a wide range of cultures extending back into Bronze Age and Neolithic prehistory The overwhelming consistency among legends and myths of flood and the repopulation of man from a flood hero similar to the Noah Flood are found in distant parts of the Earth The myths similar to the Garden of Eden Paradise or Divine Land echo among the populations around the world Memories of their origin are documented in their legends such as the stories of Atlantis Neserser Land of Punt Land of Ophir Kumari Kadam Kangdez and Taprobana Pyramids spread in many parts of the world and emerged separately from one another by oceans who supposedly never discovered each other s existence Those indicate that they were derived from a common origin Further scholastic belief by etymologists and linguists are positive that all world languages sprang from a common source

over 2 300 years ago debate has raged as to whether or not Atlantis ever really existed The existence of Atlantis is supported by the fact that it is described in great details by Plato In additions various conditions events and goods unknown to Plato are also described in detailed and lengthy words The recent knowledge of late glacial and postglacial sea level rise and land subsidence that occurred almost precisely at the time described by Plato also becomes strong evidence to the truth of the story Plato describes the Atlantis from point of views of geography climate plain layout city layout river and channel hydraulics produces social structure customs mythology and its destruction in details including their dimensions and orientations These become the subjects of the author to hypothesize that the lost city of Atlantis is in Java Sea The works include over 5 year research and analysis of textbooks papers internet sites and digital data collected by the author as well as some site observations These resulted in accurate evidence to the hypothesis that the story fits the location in question The book discusses the existence of Atlantis in specific details that have never been written by others *Vanished Islands and Hidden Continents of the Pacific* Patrick D. Nunn,2008-10-31 Islands as well as entire continents are reputed to have disappeared in many parts of the world Yet there is little information on this subject concerning its largest ocean the Pacific Over the years geologists have amassed data that point to the undeniable fact of islands having disappeared in the Pacific a phenomenon that the oral traditions of many groups of Pacific Islanders also highlight There are even a few instances where fragments of Pacific continents have disappeared becoming hidden from view rather than being submerged In this scientifically rigorous yet readily comprehensible account of the fascinating subject of vanished islands and hidden continents in the Pacific the author ranges far and wide from explanations of the region s ancient history to the meanings of island myths Using both original and up to date information he shows that there is real value in bringing together myths and the geological understanding of land movements A description of the Pacific Basin and the ups and downs of the land within its vast ocean is followed by chapters explaining how long before humans arrived in this part of the world islands and continents that no longer exist were once present A succinct account is given of human settlement of the region and the establishment of cultural contexts for the observation of occasional catastrophic earth surface changes and their encryption in folklore The author also addresses the persistent myths of a sunken continent in the Pacific which became widespread after European arrival and were subsequently incorporated into new age and pseudoscience explanations of our planet and its inhabitants Finally he presents original data and research on island disappearances witnessed by humans recorded in oral and written traditions and judged by geoscience to be authentic Examples are drawn from throughout the Pacific showing that not only have islands collapsed and even vanished within the past few hundred years but that they are also liable to do so in the future *Sunken Realms* Karen Mutton,2011-03-09 Australian researcher Karen Mutton has compiled the world s most extensive list of sunken cities and megalithic underwater sites currently known around the world She begins by discussing some of the causes for sunken ruins super floods volcanoes earthquakes at the end of the last great flood plate

tectonics and other theories She then discusses Plato's Atlantis and the various areas of the Mediterranean and Atlantic that have been proposed as the location From there she launches into a worldwide cataloging of underwater ruins by region She begins with the many underwater cities in the Mediterranean and then moves into northern Europe and the North Atlantic She continues with chapters on the Caribbean and then moves through the extensive sites in the Pacific and Indian Oceans The final chapters are on ruins and structures in lakes and inland seas plus a brief look at modern and medieval sunken ruins Comes with plenty of maps illustrations and rare photos Places covered in this book include Tartessos Cadiz Morocco Alexandria The Bay of Naples Libya Phoenician and Egyptian sites Roman era sites Yarmuta Lebanon Cyprus Malta Thule Celtic Realms Lyonesse Ys and Hy Brasil Carnac Brittany Isle of Wight Canary and Azore Islands Bahamas Cuba Bermuda Mexico Peru Micronesia California Japan Indian Ocean Sri Lanka Land Bridge India Sumer Lake Titicaca and inland lakes in Scotland Russia Iran China Wisconsin Florida and more A unique and fascinating book Pseudoscience Brian Regal, 2009-10-15 More than just a collection of factual entries this rich resource explores the difference between scientific and pseudoscientific pursuits in a way that spurs readers to ask questions and formulate answers What makes science science How do we tell which assertions beliefs and methods are scientifically sound and which are not Brian Regal's authoritative entertaining new reference Pseudoscience A Critical Encyclopedia gets at the heart of these questions by helping readers understand how the scientific method works how to critically analyze all kinds of evidence and how to sort through long running myths and current pseudoscience controversies Ranging from the dawn of history to the present and across world cultures Pseudoscience uses a field of endless fascination as a means of driving home the importance of solid scientific reasoning The encyclopedia spans the full spectrum of scientific and nonscientific pursuits from chemistry biology psychology and medicine to eugenics religion cryptozoology the occult and paranormal activities Specific entries focus on general concepts of science the lives of individuals and claims of abilities Throughout these entries go beyond simply stating facts by constantly engaging readers in a discussion about the very nature of true scientific discovery
