Aulton's Pharmaceuticals E-Book Kevin M.G. Taylor, Michael E. Aulton, 2013-07-29 Pharmaceuticals is one of the most diverse subject areas in all of pharmaceutical science. An understanding of pharmaceuticals is therefore vital for all pharmacists and those pharmaceutical scientists who are involved with converting a drug or a potential drug into a medicine that can be delivered safely, effectively, and conveniently to the patient. Now in its fourth edition, this best-selling textbook in pharmaceuticals has been brought completely up to date to reflect the rapid advances in delivery methodologies by eye and injection, advances in drug formulations and delivery methods for special groups such as children and the elderly, nanomedicine, and pharmacogenetics. At the same time, the editors have striven to maintain the accessibility of the text for students of pharmacy, preserving the balance between being a suitably pitched introductory text and a clear reflection of the state of the art. New to this edition: New editor Kevin Taylor, Professor of Clinical Pharmaceutics, School of Pharmacy, University of London. Twenty-two new contributors. Six new chapters covering parenteral and ocular delivery, design and administration of medicines for the children and elderly, the latest in plant medicines, nanotechnology, and nanomedicines, and the delivery of biopharmaceuticals. Thoroughly revised and updated throughout, it provides a logical, comprehensive account of drug design and manufacture, including the science of formulation and drug delivery, designed and written for newcomers to the design of dosage forms.
