Automated Data Warehouse Testing Beginners Step By Step:

Automated Data Warehouse Testing G. Suden, 2015-03-13 Automated Data Warehousing Testing is a beginner's step by step guide for novice to intermediate level testers who want to try their hands at automated testing. It provides step by step instructions for setting up the Automation Framework from scratch. The framework is quite generic and as such can be applied to most data warehousing projects. This book concentrates on the practical side of automated testing rather than the theoretical side. It includes complete listings of the automated code for a sample data warehouse that is set up for testing. The code listings explain the logic for the individual tests and generic functions. The book covers: An overview of the data warehouse architecture and modelling; Set up the environment for automation; Software used is open source and freeware; Set up the Automation Framework from scratch and add important features to it like logging information to console and files; Set up the sample data warehouse for automation including the source systems and staging area; Automate the testing of staging area dimension and fact tables; Automate the testing of CSV and Microsoft Excel data sources; Generate HTML reports of the test results; Automate Data Profiling tests. More Agile Testing Janet Gregory, Lisa Crispin, 2015 Janet Gregory and Lisa Crispin pioneered the agile testing discipline with their previous work Agile Testing Now. In More Agile Testing they reflect on all they've learned since. They address crucial emerging issues, share evolved agile practices, and cover key issues agile testers have asked to learn more about. Packed with new examples from real teams, this insightful guide offers detailed information about adapting agile testing for your environment, learning from experience, and continually improving your test processes, scaling agile testing across teams, and overcoming the pitfalls of automated testing. You'll find brand new coverage of agile testing for the enterprise, distributed teams, mobile, embedded systems, regulated environments, data warehouse, BI systems, and DevOps practices. You'll come away understanding: How to clarify testing activities within the team; Ways to collaborate with business experts to identify valuable features and deliver the right capabilities; How to design automated tests for superior reliability and easier maintenance; How agile team members can improve and expand their testing skills; How to plan just enough, balancing small increments with larger feature sets and the entire system; How to use testing to identify and mitigate risks associated with your current agile processes and to prevent defects; How to address challenges within your product or organizational context; How to perform exploratory testing using personas and tours; Exploratory testing approaches that engage the whole team using test charters with session and thread based techniques; How to bring new agile testers up to speed quickly without overwhelming them. The eBook edition of More Agile Testing also is available as part of a two eBook collection The Agile Testing Collection 9780134190624. **Warehouse and Distribution Automation Handbook** Nicholas D. Testing the Data Warehouse Practicum Doug Vucevic, Wayne Yaddow, 2012-08-22 The quality of a data warehouse DWH is the elusive aspect of it not because it is hard to achieve once we agree what it is but because it is difficult to describe We propose the notion that quality is not an attribute or a feature that a product has to possess but rather a relationship between that product and each and every stakeholder More specifically the relationship between the software quality and the organization that produces the products is explored Quality of data that populates the DWH is the main concern of the book therefore we propose a definition for data quality as fitness to serve each and every purpose Methods are proposed throughout the book to help readers achieve data warehouse quality **ASTM Standardization News** American Society for Testing and Materials, 1982 **Operations Management** R.
