B K Matilal By Logic Language And Reality:

Logic, Language and Reality Bimal Krishna Matilal, 2008-01-01 The word philosophy as well as the conjuring expression Indian philosophy has meant different things to different people endeavours and activities old and new grave and frivolous edifying and banal esoteric and exoteric In this book the author has chosen deliberately a very dominant trend of the classical Sanskrit philosophical literature as his subject of study The age of the material used here demands both philological scholarship and philosophical amplification Classical pramanasastras usually deal with the theory of knowledge the nature of inference and language and the related questions of ontology and semantics Several important concepts and theories have been singled out for critical analysis and clarification in modern terms so that the results may be intelligible to modern students of both Sanskrit and philosophy It is hoped that such an attempt will kindle the enthusiasm of young scholars in the field and inspire them to proceed in this comparatively new area of research and explore further and more interesting possibilities

Logic, Language, and Reality Bimal Krishna Matilal, 1985 **Philosophy in Classical India** Jonardon Ganeri, 2003-09-01 This original work focuses on the rational principles of Indian philosophical theory rather than the mysticism more usually associated with it Ganeri explores the philosophical projects of a number of major Indian

philosophers and looks into the methods of rational inquiry deployed within these projects In so doing he illuminates a network of mutual reference criticism influence and response in which reason is used to call itself into question This fresh perspective on classical Indian thought unravels new philosophical paradigms and points towards new applications for the concept of reason

Indian Buddhist Philosophy Amber Carpenter, 2014-09-03 Organised in broadly chronological terms this book presents the philosophical arguments of the great Indian Buddhist philosophers of the fifth century BCE to the eighth century CE Each chapter examines their core ethical metaphysical and epistemological views as well as the distinctive area of Buddhist ethics that we call today moral psychology Throughout this book follows three key themes that both tie the tradition together and are the focus for most critical dialogue the idea of anatman or no self the appearance reality distinction and the moral aim or ideal Indian Buddhist philosophy is shown to be a remarkably rich tradition that deserves much wider engagement from European philosophy Carpenter shows that while we should recognise the differences and distances between Indian and European philosophy its driving questions and key conceptions we must resist the temptation to find in Indian Buddhist philosophy some Other something foreign self contained and quite detached from anything familiar Indian Buddhism is shown to be a way of looking at the world that shares many of the features of European philosophy and considers themes central to philosophy understood in the European tradition

Logic, Language, and Reality Bimal Krishna Matilal, 1990 **Identity as Reasoned Choice** Jonardon Ganeri, 2012-02-02 In an increasingly multi religious and multi ethnic world identity has become something actively chosen rather than merely acquired at birth This book essentially analyzes the resources available to make such a choice Looking into the world of intellectual India this unique comparative

survey focuses on the identity resources offered by India's traditions of reasoning and public debate. Arguing that identity is a formation of reason, it draws on Indian theory to claim that identities are constructed from exercises of reason as derivation from exemplary cases. The book demonstrates that contemporary debates on global governance and cosmopolitan identities can benefit from these Indian resources which were developed within an intercultural pluralism context with an emphasis on consensual resolution of conflict. This groundbreaking work builds on themes developed by Amartya Sen to provide a creative pursuit of Indian reasoning that will appeal to anyone studying politics, philosophy and Asian political thought.

Recognizing Reality Georges B. J. Dreyfus, 1997-01-22 Dreyfus examines the central ideas of Dharmakīrti, one of the most important Indian Buddhist philosophers and their reception among Tibetan thinkers. During the golden age of ancient Indian civilization, Dharmakīrti articulated and defended Buddhist philosophical principles. He did so more systematically than anyone before his time, the seventh century CE, and was followed by a rich tradition of profound thinkers in India and Tibet. This work presents a detailed picture of this Buddhist tradition and its relevance to the history of human ideas. Its perspective is mostly philosophical, but it also uses historical considerations as they relate to the evolution of ideas.

Self as Person in Asian Theory and Practice Roger T. Ames, Wimal Dissanayake, Thomas P. Kasulis, 1994-01-25 This book is a sequel to *Self as Body in Asian Theory and Practice* (SUNY, 1992) and anticipates a third book, *Self as Image in Asian Theory and Practice*. In order to address issues as diverse as the promotion of human rights or the resolution of sexism in ways that avoid inadvertent lapses into cultural chauvinism, alternative cultural perspectives that begin from differing conceptions of self and self-realization must be articulated and respected. This book explores the articulation of personal character within the disparate cultural experiences of Japan, China, and South Asia.

Śabda, a Study of Bhartr̥hari's Philosophy of Language Tandra Patnaik, 1994 This book offers a study of Bhartr̥hari's *Vākyapadīya* in an altogether modern, the post-Fregean perspective on the philosophy of language. Bhartr̥hari's analysis of language is presented methodically and in contemporary philosophical idiom.

Minds and Sociocultures: Zoroastrianism and the Indian religions Kevin R. D. Shepherd, 1995 The lengthy introduction, which has been described as a book in itself, includes a vigorous critique of the New Age counterculture. A confrontation occurs with Eliade, Jung, Leary, Grof, Aldous Huxley, Ken Wilbur, Colin Wilson, and others. The author objects to popular theories of the perennial philosophy and provides an alternative set of references from specialist scholarship. Scholarly theories: The legendary prophet Zarathushtra gains life in this overview. The focus moves to the Sassanian era of Gnostic associations encompassing not only Manichaeism but also the more obscure Mazdakism. Civilization to the Upanishadic era. Part four covers the six classical systems of Hindu philosophy and includes the medieval Vedāntic exponents Shankara and Rāmānuja. Part five investigates the Śramaṇa philosophers who included Gautama Buddha, and an attempt is made to chart occurrences in Jainism, a subject more rarely dealt with.
