While each financial crisis is unique and has its own special features, there are a lot of similarities in the dynamics leading to a crisis and also in their resolutions. Some of the financial crises are caused by the lack of appropriate regulation, but often the regulators were ignoring the signals of imminent crises while serving implicitly or explicitly the financial industry. In his book, Prof. Kedar Levy is providing a fresh look at many famous financial crises around the globe, analysing their causes and effects. The special role of regulators is highlighted, including the Capture Theory in practice. This book is suitable for economists as well as for those interested in economic history and for all those concerned with the stability of current international financial markets. Professor Dan Galai, The Hebrew University, Jerusalem.

Empirical research shows that two thirds, some claim even four fifths, of all acquisitions fail. Bad acquisitions can spell disaster for a company, but if successful, they can lead to healthy growth, enhanced competitiveness, and a world market position. Despite the vast amount of academic and practical research on M&A, there are still no adequate theories to explain this continued trend of failure. In fact, although success factors have been broadly researched and are well known, most work still concentrates on them without concomitantly touching upon the necessary governance structure which enables their effective deployment. This is crucial. In order to determine what constitutes an effective board and governance structure, extensive qualitative fieldwork was carried out through discussions with some of the most renowned international CEOs and Chairmen. From this, two in-depth analyses of prominent cases are made: one of extraordinary success and the other of integral failure. The business leaders' management

approaches are scrutinised revealing significant differences between what worked and what did not and recommendations are derived for improved corporate governance The author s conclusions sharply illustrate the limits and challenge the inadequacies of current business practice revealing gaps between mainstream theory and the reality of the boardroom Due to his innovative approach the study is praised by practitioners for its additions to strategic management understanding and its provision of effective tools for boards and managers

Caught by History Ernst van Alphen,1997 In the face of strong moral and aesthetic pressure to deal with the Holocaust in strictly historical and documentary modes this book discusses why and how reenactment of the Holocaust in art and imaginative literature can be successful in simultaneously presenting analyzing and working through this apocalyptic moment in human history In pursuing his argument the author explores such diverse materials and themes as the testimonies of Holocaust survivors the works of such artists and writers as Charlotte Salomon Christian Boltanski and Armando and the question of what it means to live in a house built by a Jew who was later transported to the death camps He shows that reenactment as an artistic project also functions as a critical strategy one that unlike historical methods requiring a mediator speaks directly to us and lures us into the Holocaust We are then placed in the position of experiencing and being the subjects of that history We are there and history is present but not quite A confrontation with Nazism or with the Holocaust by means of a re enactment takes place within the representational realm of art Our access to this past is no longer mediated by the account of a witness by a narrator by the eye of a photographer We do not respond to a re presentation of the historical event but to a presentation or performance of it and our response is direct or firsthand in a different way That different way of keeping in touch is the subject of inquiry that propels this study
