Violence in a Post-9/11 World Bronwyn Winter, 2017-03-23 September 11 has become a temporal and symbolic marker of the world's brutal entry into the third millennium Nearly all discussions of world politics today include a tacit if not overt reference to that historical moment A decade and a half on Winter considers the impact of 9 11 on women around the world How were women affected by the events of that day Were all women affected in the same way Based on theoretical reflection

empirical research and field work in different parts of the world each chapter of the book considers a different post 9 11 issue in relation to women global governance human security globalized militarism identity and sexuality in transnational feminist movements Annual Report on the OECD Guidelines for Multinational Enterprises 2011 A New Agenda for the Future OECD,2012-01-02 The report provides a first assessment of the outcome of the 2011 Update of the Guidelines adopted at the OECD Ministerial Meeting and a compilation of ideas for future implementation It also reports the actions taken by the 42 adhering governments from June 2010 to June 2011 *The Modern Defense Industry* Richard A. Bitzinger,2009-10-15 Whether it s guns and ammunition or multidimensional anti terrorism systems the defense industry is dynamic complex and ubiquitous It is also mysterious powerful and controversial involving thousands of players worldwide from suppliers and producers to government and military procurers to shadowy figures that trade in the black market This comprehensive two volume reference will explore on a global scale the various issues concepts problems and controversies surrounding the rise of the modern defense industry Unparalleled in its scope and insight The Modern Defense Industry will prove invaluable to the industry s critics and champions alike The phenomenon of a more or less permanent defense industry especially one so wide in scale breadth air sea land and space technology and geography is still relatively new Until now its implications for politics economics and technology have not been adequately discussed in an authoritative accessible format for scholars and researchers business people journalists policymakers and interested laymen The Modern Defense Industry addresses the period from 1945 to the present covering the United States Europe Russia China Israel and other important arms producing and arms procuring countries Including essays by experts from around the world a glossary data on firms and governments laws and policies primary documents case studies and a host of other elements this set will be a unique resource for anyone interested in the arms industry It will also offer penetrating insights into topics like international relations and diplomacy arms proliferation and contemporary politics Volume I comprises chapters by experts in the field on topics like the relationship between the industry military and government how new modes of warfare are changing the industry the implications of globalization on the industry the black and gray areas of the arms trade and much more Volume II features an extensive A Z glossary of terms lists of defense firms and government agencies annotated primary documents lists of leading defense contractors and key weapons systems an analysis of key legislation and professional organizations The Modern Defense Industry sets the standard for state of the art overviews of an industry that has for better or worse come to infuse nearly every aspect of world affairs in the early twenty first century **Drug War Pathologies** Horace A. Bartilow,2019-07-30 In this book Horace Bartilow develops a theory of embedded corporatism to explain the U S government s war on drugs Stemming from President Richard Nixon s 1971 call for an international approach to this war U S drug enforcement policy has persisted with few changes to the present day despite widespread criticism of its effectiveness and of its unequal effects on hundreds of millions of people across the Americas While researchers consistently emphasize the role

of race in U S drug enforcement Bartilow s empirical analysis highlights the class dimension of the drug war and the immense power that American corporations wield within the regime Drawing on qualitative case study methods declassified U S government documents and advanced econometric estimators that analyze cross national data Bartilow demonstrates how corporate power is projected and embedded in lobbying financing of federal elections funding of policy think tanks and interlocks with the federal government and the military Embedded corporatism he explains creates the conditions by which interests of state and nonstate members of the regime converge to promote capital accumulation The subsequent human rights repression illiberal democratic governments antiworker practices and widening income inequality throughout the Americas Bartilow argues are the pathological policy outcomes of embedded corporatism in drug enforcement *Capitalism and Class Power* Ronald W. Cox,2023-11-20 How do corporations use their instrumental and structural power within markets and states to advance their policy agendas Capitalism and Class Power examines corporate power through chapters on the U S military industrial complex the rise of billionaire wealth in the U S the role of a transnational investment bloc in U S Saudi relations the rise of global disinformation firms Canadian imperialism in the English speaking Caribbean the power of an EU corporate bloc in Caribbean trade agreements the relationship between capitalism and poverty in rich capitalist countries and the relationship between neoliberalism and capitalism Professor Cox concludes the volume with reflections on the importance of corporate power research to achieving systemic change Contributors are Melissa Boissiere Aram Eisenschitz Jamie A Gough Adam D Hernandez Tamanisha J John Mazaher Koruzhde Rob Piper and Bryant William Sculos Ronald W Cox is Professor of Politics and International Relations at Florida International University He has published six books on corporate power in the global economy and is editor of the open access online journal Class Race and Corporate Power

Waging War on Corruption Frank Vogl,2016-09-06 Never before has the call for good governance been greater The Arab Spring in early 2011 has inspired people all over the world to fight to end the abuse of power by politicians and civic officials and create more transparent accountable and honest governments In Waging War on Corruption Inside the Movement Fighting the Abuse of Power Frank Vogl one of the leaders of the worldwide anticorruption movement shares a history filled with stories of heroes and victims of corruption He chronicles the successful campaigns by enormously courageous civil society activists journalists and public prosecutors and explains the crucial challenges that now must be confronted At stake is nothing less than our global security the reduction of poverty the stability of our economic and financial systems and the cause of freedom and democracy Waging War on Corruption will be of interest to readers of politics and government business human rights and law Author Frank Vogl s website here **Activity-Based Intelligence:**

Coexistence, Cooperation and Solidarity Holger P. Hestermeyer, 2011-11 Considering paradigmatic changes and current challenges in international law this collection of essays covers diverse areas such as law of the sea human rights international environmental law international dispute settlement peace and security global governance and its relationship to domestic law

Business Ethics Bob Tricker, Gretchen Tricker, 2014-01-03 Traditionally books on business ethics focus on CSR companies relations with their stakeholders and corporate citizenship More recently green credentials and sustainability have been added to that agenda Unconventionally this book argues that business ethics are basic to running business not a separate subject They are inherent to the governance and management of every organization not an optional exercise in corporate citizenship Business ethics concern behaviour in business and the behaviour of business Decisions at every level in a company have ethical implications strategically in the board room managerially throughout the organization and operationally in all of its activities The use and sometimes the abuse of corporate power the process of corporate governance raises ethical issues Business involves risk taking whether decisions are at the strategic managerial or operational level Exposure to ethical risk needs to be part of every organization s strategy formulation policy making and enterprise risk management Designed to be read by both undergraduates and postgraduates this book is a primer on ethics in business It is also relevant to ethics courses that are now part of many legal accountancy and other professional examinations The book is not about moral philosophy nor does it prescribe appropriate standards of behaviour or recommend economic legal or political solutions Rather it enables readers to recognize ethical issues in business to respond appropriately and to embed ethics in business processes The book not only considers what business ethics are and why they are important but offers practical approaches on how to develop a successful corporate ethics culture

The Great Disruption The Economist, Adrian Wooldridge, 2015-06-02 The Great Disruption is a collection drawn from Adrian Wooldridge s influential Schumpeter columns in The Economist addressing the causes and profound consequences of the unprecedented disruption of business over the past five years The Great Disruption has many causes The internet is spreading faster than any previous technology Emerging markets are challenging the west s dominance of innovation as well as manufacturing Clever management techniques such as frugal innovation are forcing companies to rethink pricing Robots are advancing from the factory floor into the service sector But these developments are all combining together to shake business life and indeed life in general to its foundations The Great Disruption is producing a new class of winners many of whom are still unfamiliar Asian has more female billionaires and CEOs than Europe for example It is also producing a growing class of losers old fashioned universities

that want to continue to operate in the world of talk and chalk companies that refuse to acknowledge that competition is now at warp speed and business people who think that we still live in the world of company man It is forcing everybody to adapt or die workers realize that they will have to jump from job to job and indeed from career to career and institutions realize that they need to remain adaptable and flexible The Great Disruption is all the more testing because it coincides with the Great Stagnation The financial crisis has not only reduced most people's living standards in the west It has also revealed that the boom years of 2000-2007 were built on credit individuals and governments were borrowing money to pay for lifestyles that no longer had any real justification Employees are having to cope with unprecedented change at a time when they are also seeing their incomes flat or declining Companies are having to respond to revolutionary innovations even as they are seeing their overall markets contract We are all having to run faster in order to stay in the same place This book begins with a long introduction explaining the thesis of the book and setting it in a broad historical context It will also introduce readers to Joseph Schumpeter and explain why his ideas about creative destruction are particularly valuable today

Aircraft as a System of Systems Sean Barker, 2018-10-11 Aircraft as a System of Systems A Business Process Perspective written by Sean Barker FBCS CEng and a former research scientist at BAE Systems in the UK explains how developing even simple parts like a lever needs several different types of knowledge before moving on to the complications of designing a system Today's airframers have taken on more of the role of systems integrators putting the focus on the aircraft as a system of many systems Whereas an aircraft integrates many different systems into a single design the system of systems which supports it is built by federating the systems of the different organizations which were built and run independently of each other Aircraft as a System of Systems A Business Process Perspective provides a thorough analysis of how building aircraft taps into a huge pool of knowledge how its complexity is also reflected in the numerous process links that exchange knowledge between different groups But unlike conventional business processes design processes do not follow one step after another rather a decision made at one point in the design is communicated to other areas of the design which may in turn feed back new constraints that force the first decision to be revised
