Media,2022-03-01T21:00:00Z Please note This is a companion version not the original book Sample Book Insights 1 The roots of Western philosophy can be found in the work of Greek philosophers during the fifth and sixth centuries These philosophers later referred to as pre Socratic started to question the world around them Rather than attributing their surroundings to the Greek gods they searched for more rational explanations 2 The term pre Socratic refers to the differences in ideology and principles between the pre Socratic philosophers and those of Socrates While many pre Socratic philosophers produced texts none have survived and most of what we know about the pre Socratic philosophers is based on the fragments of text that remain and the quotes of later historians and philosophers which were usually biased 3 The ancient Greek philosopher and mathematician Pythagoras believed that the basis of all reality was mathematical relations He believed that numbers were sacred and with the use of mathematics everything could be measured and predicted 4 The school of Elea was the first to use pure reason as the only criterion for finding truth They believed that reality didn t have to do with the world we experience and that it could be understood through reason alone **PHILOSOPHY 101** Georgia Harrison,2023-04-16 Discover the

the Near East and the forces which propelled it The author Emmet Sweeney finds that the early civilizations developed amidst a background of massive and repeated natural catastrophes events which had a profound effect upon the ancient peoples and left its mark upon their myths legends customs and religions Ideas found in all corners of the globe concepts such as dragon worship pyramid building and human sacrifice are shown by Sweeney to have a common origin in the cataclysmic events of the period termed the eruptive age by legendary English explorer Percy Fawcett Terrified and traumatized by the forces of nature people all over the world began to keep an obsessive watch on the heavens and to offer blood sacrifices to the angry sky gods These events which are fundamental to any understanding of the first literate cultures have nonetheless been completely effaced from the history books and an official history of mankind which is little more than an elaborate fiction now graces the bookshelves of the world s great libraries Starting with clues unearthed by history sleuth Immanuel Velikovsky and others Emmet Sweeney takes the investigation further While the Near Eastern civilizations are generally considered to have taken shape around 3300 BC about 2 000 years before those of China and the New World Ages in Alignment demonstrates that they had no 2 000 year head start All the ancient civilizations arose simultaneously around 1300 BC in the wake of a terrible natural catastrophe recalled in legend as the Flood or Deluge Sweeney points out that the presently accepted chronology of Egypt is not based on science but on venerated literary tradition This chronology had already been established in its present form by the third century BC when Jewish historians utilizing the History of Egypt by the Hellenistic author Manetho sought to tie in Egypt s history with that of the Bible Apparent gaps and weird repetitions resulted Improbable feats like the construction of major cut stone engineering projects before the advent of steel tools or Pythagorean geometry point to the weaknesses of the traditional view Taking a more rigorous approach and pointing to solid evidence Emmet Sweeney shows where names overlap and where one and the same group is mistaken for different peoples in different times Volume 1 The Genesis of Israel and Egypt looks at the archaeological evidence for the Flood evidence now misinterpreted and ignored This volume examines the rise of the first literate cultures in the wake of the catastrophe and goes on to trace the story of the great migration which led groups of early Mesopotamians westward toward Egypt where they helped to establish Egyptian civilization This migration recalled in the biblical story of Abraham provides the first link between Egyptian and Hebrew histories The next link comes a few generations later with Imhotep the great seer who solved the crisis of a seven year famine by interpreting pharaoh Djoser s dream Imhotep is shown to be the same person as Joseph son of Jacob
