Catalogue of high-school and college textbooks Ginn and Company, 1911 *Catalogue of High-school & College Textbooks, Including a Complete Index & Price List 1911* Ginn & co., publishers, Ginn and Company, 1911 *Handbook of Creativity* John A. Glover, Royce R. Ronning, Cecil R. Reynolds, 2013-03-09

The motivation underlying our development of a handbook of creativity was different from what usually is described by editors of other such volumes. Our sense that a handbook was needed sprang not from a deluge of highly erudite studies calling out for organization nor did it stem from a belief that the field had become so fully articulated that such a book was necessary to provide summation and reference. Instead, this handbook was conceptualized as an attempt to provide structure and organization for a field of study that from our perspective had come to be a large scale example of a degenerating research program. See Brown Chapter 1. The handbook grew out of a series of discussions that spanned several years. At the heart of most of our interactions was a profound unhappiness with the state of research on creativity. Our consensus was that the number of good works published on creativity each year was small and growing smaller. Further, we could not point to a journal text or professional organization that was providing leadership for the field in shaping a scientifically sound framework for the development of research programs in creativity. At the same time, we were casting about for a means of honoring a dear friend, E. Paul Torrance. Our decision was that we might best be able to honor Paul and influence research on creativity by developing a handbook designed to challenge traditional perspectives while offering research agendas based on contemporary psychological views.

Resources and Teacher Resourcefulness Casey Langer Tesfaye, Susan White, 2014 What textbooks are physics teachers using How highly do they rate those textbooks What other types of materials do teachers use The textbooks and other resources used by high school physics teachers in the US have evolved along with the changing demands of physics classes and the evolving set of options available to teachers In this report Tesfaye and White identify the most widely used textbooks for each type of physics class and share the teachers ratings of the textbooks they use They then take a closer look at the other types of resources teachers are using for their classes Teachers demonstrate quite a bit of initiative creativity and resourcefulness Instead of simply using the texts that are supplied to them they use a wide variety of resources in order to create a curriculum that works well with the needs of their students and the requirements of their schools Circular Relative to Textbooks for Elementary and High Schools Saskatchewan.
