Esthetic dentistry is just not limited to color matching restorations but soft tissue considerations like position of the lips, color and contour of gingiva around teeth also play a very important role in overall esthetic appearance of face. Periodontal plastic surgeries in its broad term covers various procedures either around natural teeth or dental implant fixtures in the esthetic zone. This may range from crown lengthening procedures, coverage of denuded root surfaces, ridge augmentation, periodontal prosthetic corrections and cosmetic surgical corrections around dental implants.
