Political Order in Changing Societies emerged against the

intellectual trend towards modernization theory in the post-War period. Modernization theory, whether it in the form of the Rostovian take-off model, or links between democratization and modernization examined by scholars such as David Apter, generally regarded being modern as a good thing. Economic development would lead to increased education and the emergence of modern values such as rationalism and secularism, allowing corresponding political development. Modernization theory of course became a target for a wide range of criticisms. Some viewed it as an ahistorical attempt to impose a Western version of "modernity" on the world. Others looked to world systems theories or dependency theory to explain "underdevelopment" in the non-Western world. In contrast, Huntington challenged modernization theory from a conservative perspective.

Huntington noted that during the 1950s and 1960s political violence and disorder actually increased dramatically. The period was marked, not by political development, but by "political decay." Contrary to the expectations of modernization theory, this "violence and instability" was "in a large part the product of rapid social change and the rapid mobilization of new groups into politics coupled with the slow development of political institutions (p. 4)." In many Asian, African, and Latin American countries "[t]he rates of social mobilization and the expansion of political participation are high; the rates of political organization and institutionalization are low. Conceptualizing Politics Furio Cerutti, 2017-04-21 Politics is hugely complex Some try to reduce its complexity by examining it through an ideological worldview a one size fits all prescriptive formula or a quantitative examination of as many facts as possible Yet politics cannot be adequately handled as if it were made of cells and particles ideological views are oversimplifying and sometimes dangerous Politics is not simply a moral matter nor political philosophy a subdivision of moral philosophy This book is devised as a basic conceptual lexicon for all those who want to understand what politics is how it works and how it changes or fails to change Key concepts such as power conflict legitimacy and order are clearly defined and their interplay in the state interstate and global level explored Principles such as liberty equality justice and solidarity are discussed in the context of the political choices confronting us This compact and systematic introduction to the categories needed to grasp the fundamentals of politics will appeal to readers who want to gain a firmer grasp on the workings of politics as well as to scholars and students of philosophy political science and history

Rethinking Democracy Promotion in International Relations Jessica Schmidt, 2015-08-20 This book traces and conceptualises the changing notion of democracy and demonstrates how democracy promotion finds itself at the heart of contemporary international discourses and policies Democracy promotion is widely considered to constitute a hypocritical and failed grand international narrative of the 1990s and has allegedly been replaced by other more pressing and academically more captivating concerns such as conflict management statebuilding and climate change This book challenges this position and argues that the core notions of

democracy promotion such as empowerment inclusion and responsiveness are a key concern of contemporary international policymakers Drawing on the work of Michel Foucault Hannah Arendt as well as John Dewey it investigates the notion of democracy and modality of its promotions through the policy fields of conflict management statebuilding and climate change The central development the book observes is the reconceptualisation of democracy from the constituted sphere of the public to the lived relations of the social The book argues that the novel rationality of democracy and its promotion offers a particular solution to governing impasses in a world perceived to be globalised and complex which accounts for democracy s current but neglected centrality This book will be of much interest to students of democracy intervention statebuilding global governance and IR in general Political Order in Changing Societies, by Samuel P. The Lure of Authoritarianism Stephen J. King, Abdeslam M. Maghraoui, 2021-12-22 The works collected in *The Lure of Authoritarianism* consider the normative appeal of authoritarianism in light of the 2011 popular uprisings in the Middle East Despite what seemed to be a popular revolution in favor of more democratic politics there has instead been a slide back toward authoritarian regimes that merely gesture toward notions of democracy In the chaos that followed the Arab Spring societies were lured by the prospect of strong leaders with firm guiding hands The shift toward normalizing these regimes seems sudden but the works collected in this volume document a gradual shift toward support for authoritarianism over democracy that stretches back decades in North Africa Contributors consider the ideological socioeconomic and security based justifications of authoritarianism as well as the surprising and vigorous reestablishment of authoritarianism in these regions With careful attention to local variations and differences in political strategies the volume provides a nuanced and sweeping consideration of the changes in the Middle East in the past and what they mean for the future Salafism and Political Order in Africa Sebastian Elischer, 2021-08-05 Violent Islamic extremism is affecting a growing number of countries in sub Saharan Africa In some jihadi Salafi organizations have established home bases and turned into permanent security challengers However other countries have managed to prevent the formation or curb the spread of homegrown jihadi Salafi organizations In this book Sebastian Elischer provides a comparative analysis of how different West and East African states have engaged with fundamentalist Muslim groups between the 1950s and today In doing so he establishes a causal link between state imposed organizational gatekeepers in the Islamic sphere and the absence of homegrown jihadi Salafism Illustrating that the contemporary manifestation of violent Islamic extremism in sub Saharan Africa is an outcome of strategic political decisions that are deeply embedded in countries autocratic pasts he challenges conventional notions of statehood on the African continent and provides new insight into the evolving relationships between secular and religious authority **Hong Kong in the Shadow of China** Richard C.
