Poverty Inequality And Growth In Developing Countries Theoretical And Empirical Approaches Routledge Studies In The Modern World Economy:

Poverty, Inequality and Growth in Developing Countries Atsushi Maki, 2015-06-05 There are many problems regarding poverty inequality and growth in developing countries in Asia and Africa Policy makers at the national level and at international institutions such as the United Nations World Bank International Monetary Fund and others have implemented various policies in order to decrease poverty and inequality This book provides empirical observations on Asian countries and Africa Each chapter provides theoretical and empirical analysis on regional case studies with an emphasis on policy implications The book will be of use to many who wish to assess and improve policies in developing countries and mitigate poverty and inequality and stimulate growth by drawing on relevant empirical research and economic theories Clearly there have been numerous policy failures and the book aims to provide a basis for improving policies and outcomes based on relevant empirical observations **The Economics of Waste Management in East Asia** Masashi Yamamoto, Eiji

Hosoda, 2016-04-14 The existing literature provides very little information on the real and current process of waste disposal and recycling in China China generates large amount of waste and it covers about 20 % of the world waste trade This book focuses on China's waste management and recycling policy The book also examines the relationship between China's waste management and recycling industry and its legal structure It fills in the gap by providing insight into topics on how to resolve China's waste management and recycling problems theories and empirical studies on waste and management as well as waste management policies in East Asia It also includes comparative analysis through case studies on other Asian countries such as Thailand and Japan **The Local Impact of Globalization in South and Southeast Asia** Bart Lambregts, Niels

Beerepoot, Robert Kloosterman, 2015-08-27 In the past two decades several millions of IT enabled services jobs have been relocated or offshored from the US and Europe to in particular low cost economies around the world Most of these jobs so far have landed in South and South East Asia with India and the Philippines receiving the bulk of them This has caused profound changes in the international division of labour and has had correspondingly wide social and economic effects This book examines how this next wave in globalization affects people and places in South and South East Asia It brings together twelve case studies from India the Philippines China Hong Kong and Thailand and explores how and for whom services offshoring creates opportunities triggers local economic transformations and produces challenges This book in addition compares how different countries take part in this second global shift investigates service sector driven economic development from a historical perspective and engages with the question whether and to what extent services offer a new promising avenue of sustained economic growth for developing countries It argues that service led development in developing countries is not easy for all the workers involved or a guaranteed path to sustained economic development and prosperity This volume stands out from other books in the field in its exploration of the social and economic outcomes in the

cities and countries where services have been located Based on cutting edge empirical research and original data the volume offers a state of the art contribution to this growing debate The book provides valuable insights for students scholars and professionals interested in services offshoring socio economic development and contemporary transformations in South and South East Asia *Insights into Inclusive Growth, Employment and Wellbeing in India* Arup Mitra,2012-08-12 What changes are occurring at the macro and the sectoral levels how the labour market changes are taking place and what impact is felt on the low income households are some of the questions that the present volume focuses on It begins by examining the sectoral composition of growth revisiting the issues related to industry services balance and also brings out the spatial dimension of growth On the one hand the industry does not seem to have played a major role in the context of employment generation as imported technology is by and large capital intensive in nature On the other hand the services led growth is seen to have reduced the pace of poverty reduction Given the services led growth the possible impact of trade in services on employment both in the formal and informal sectors have been worked out indicating limited positive spill over effects The labour market outcomes are brought out with great details suggesting that rapid economic growth in India could not result in productive employment generation on a large scale The gender dimensions of employment are brought out to verify if reduction in labour market inequality can result in improving the position of women in other spheres encompassing the decision making process both within the household and outside the household Issues relating to urbanisation and rural urban migration are also covered to understand the dynamics of urban poverty and to bring out the challenges of population transfer given the spatial concentration of growth The job search practices pursued by the low income households are often pursued in terms of informal networks What problems are associated with such mechanisms in experiencing improvements in wellbeing levels are covered in the present volume On the whole the volume offers an explanation of limited poverty reduction in a situation of rapid economic growth on the basis of an inter disciplinary framework though efforts are being made to keep the methodology quantitatively rigorous **Structural Transformation and Sustainable Development in the Global South**

Seung Jin Baek,2021-12-24 This book investigates the relationship between sustainable development and structural transformation within international development policy On the one hand sustainable development is promoted as a multi dimensional concept for achieving environmentally and socially responsible change On the other hand structural transformation refers to a sustained period of growth in living standards and incomes that brings sectoral change For some these two objectives seem at odds with each other but this book argues that incorporating environmental initiatives into structural transformation goals in lower income countries actually results in better results than strategies prioritising economic growth Drawing on extensive structural equation modelling and original analysis the book presents an innovative inclusive sustainable development framework to demonstrate the benefits of a more integrated approach to development planning aiming for structural transformation in line with inclusive sustainable development principles This book will be of

interest to students and researchers of global development and to policymakers within government and development organizations **Managing without Growth, Second Edition** Peter A. Victor, 2018 Ten years after the publication of the first edition of this influential book the evidence is even stronger that human economies are overwhelming the regenerative capacity of the planet This book explains why long term economic growth is infeasible and why especially in advanced economies it is also undesirable Simulations based on real data show that managing without growth is a better alternative
