

The background of the cover is a photograph of a petroleum refinery at dusk or dawn. The sky is a mix of purple and blue. In the foreground, there are large, dark, curved structures that look like heat exchangers or distillation columns. In the background, there are more industrial structures, including tall distillation columns and a network of pipes and ladders. The overall color palette is dominated by blues and purples, with some warm light from the low sun.

production and consumption data *Technical Progress and Profits* John Lawrence Enos, 2002 Throughout the twentieth century the technology employed by the petroleum refining industry has been advancing rapidly yet it has generally escaped study Whatever the explanation for its scholarly neglect the advances that have been secured over the century have enabled the producers of petroleum products to meet the ever increasing demands for their products throughout the world No other manufactured goods are so universally and so cheaply available This book concentrates on the technical changes that have been secured in the second half of this century using as its basis the main petroleum refining process Fluid Catalytic Cracking Both technological and economic aspects are examined over the sixty years of the process s history and in a novel attempt related the one to the other an accomplishment that reveals more about the technology and the economics rather than either engineering or economic analysis would separately Technology and economics are connected in the real world in this study they are connected in their exposition As in conventional economic history technological improvements are summarized and their sources and consequences determined In addition the long term pattern of costs and profits is displayed and regular measurements are taken throughout so that experience can be seen as the continuous unfolding of industrial progress *Modern Petroleum Refining Processes* B.
