Sunil Kumar, 2023-06-25 Pharmaceutics deals with the formulation of a pure drug substance into a dosage form. In brief, it is concerned with the scientific and technological aspects of the design and manufacture of dosage forms or medicines. This book will be an important source of information for students learning in B Pharm and D Pharm first year first semester. This book is designed to impart a fundamental knowledge on the preparatory pharmacy with arts and science of preparing the different conventional dosage forms. Students begin by understanding the vital importance of various conventional dosage forms, provide step by step instructions for preparations, evaluation and calculations before learning about the role of various equipment and instruments. From there, students are ready to understand techniques, preparation procedures and finally how to make the elegant label for finished products.
