may be losing their raison d'être sacrificing their most crucial missions and risking loss of public understanding and support To remedy this situation Salamon recommends a renewal strategy for the nation's nonprofit sector that begins with a wider articulation and application of the sector's value proposition the attributes that continue to make it deserving of the special privileges and benefits it enjoys Salamon's pithy and accessible book is perfect for nonprofit boards leaders of charitable foundations government officials and students of the nonprofit sector and of public policy as well as anyone looking for guidance on how we go about dealing with public problems in America's increasingly collaborative system of governance

The Second Estate Ray D. Madoff, 2025-10-22 A revelatory book that lifts the curtain on America's most consequential public deception how the rich get richer using tools the government gave them Amid conflicting narratives about the drivers of wealth and inequality in the United States one constant hovers in the background the US tax code No political force has been more consequential or more utterly opaque than the 7,000 page

document that details who pays what in American society and government. Most of us have a sense that it's an unfair system. But does anyone know exactly how it's unfair? Legal scholar Ray D. Madoff knows. In *The Second Estate* she offers an unprecedented look behind the scenes of America's byzantine system of taxation, laying bare not only its capacity to consolidate wealth but also the mechanisms by which it has created two fundamentally separate American societies: the working Americans who pay and the ultra rich who benefit. This is not a story of offshore accounts or secret tax havens. In *The Second Estate*, Madoff shows that the US system itself has over time been stripped and reconstituted such that it now offers a series of secret paths hidden in plain sight for wealthy people to know to avoid taxation altogether. Through the strategic avoidance of traditional income, leveraging of investments and debt, and exploitation of rules designed to promote charitable giving, America's wealthy do more than just pay less than their share; they remove themselves from the tax system entirely. Wealth becomes its own sovereign state, and the living is surprisingly and maddeningly cheap. *The State of Nonprofit America* Lester M. Salamon, 2012-05-14 Today America's nonprofit organizations seem caught in a force field buffeted by four impulses: voluntarism, professionalism, civic activism, and commercialism. Too little attention, however, has been paid to the significant tensions among these impulses. Understanding this force field and the factors shaping its dynamics thus becomes central to understanding the future of particular organizations and of the nonprofit sector as a whole. In this second edition of an immensely successful volume, Lester Salamon and his colleagues offer an overview of the current state of America's nonprofit sector, examining the forces that are shaping its future and identifying the changes that might be needed. *The State of Nonprofit America* has been completely revised and updated to reflect changing political realities and the punishing economic climate currently battering the nonprofit sector, which faces significant financial challenges during a time when its services are needed more than ever. The result is a comprehensive analysis of a set of institutions that Alexis de Tocqueville recognized to be more deserving of our attention than any other part of the American experiment. *Giving in Time* Ray Madoff, Benjamin Soskis, 2023-03-15 Within the philanthropic sector as never before, time is of the essence. That is, temporal considerations—questions of intergenerational ethics, of the merits of giving now versus giving later, of the benefits and perils of perpetuity—have gained greatly in prominence. Bringing together the most esteemed contemporary scholars of philanthropy, *Giving in Time* provides the first sustained analysis of the complex issues surrounding the temporal dimensions of voluntary giving. Incorporating the perspectives of political scientists, historians, legal scholars, and philosophers, the contributors tackle critical questions confronting a new generation of philanthropists in a way that will appeal to academics and practitioners. They take on questions such as: What are the historical and moral foundations for establishing perpetual foundations? What are the leading challenges to philanthropic perpetuity? What is the significance of the recent trend toward "Giving While Living," the calls to give not through bequests but in one's lifetime? What are the ethical arguments for giving now rather than giving later? What is a giver's responsibility to his current moment in time versus his obligation to the future? How does the legal

framework supporting and structuring philanthropic practice shape approaches toward giving in time How should it
