

in a common strategy for reorganising the country's domestic and international relations to meet the challenge posed by a hostile external environment, correct the adverse effects of that environment consequent on the country's colonial heritage, and minimize the cost and maximize the benefits of external resources to the country. It seeks to maximize independence, promote economic development, and insure socio-political stability in a way that enhances national power (p. 14).

Nnoli is rightly critical of the earlier, somewhat naïve assumptions of pre-1967 Tanzanian diplomacy that idealistic appeals would lead to change in world affairs. More critical perceptions and explanations of international inequality and national powerlessness have led to a revised conception of its political economy and external-internal linkages. Likewise, academic approaches to African foreign policy need to learn from the existential and analytic experience and response of Tanzania in world politics.

Politics, Languages, and Thought: the Somali experience by DAVID D. LAITIN

The University of Chicago Press, 1977. Pp. 268. \$19.00.

One by-product of the U.S. Peace Corps experiment in Africa has been the substantial number of instant 'experts'. Young college graduates from the United States were sent to Africa to spend a year or two teaching and living among villagers still practising 'stone age' cultures. This, of course, moved many budding social scientists to formulate sweeping generalisations about these 'primitive' societies that presumably had been waiting all along for someone to come and properly introduce them to the outside world.

David Laitin's slim volume has to do with such a discovery and may safely be renamed *The Rediscovery of the Somali by an American*. In a stricter sense, however, the book is essentially about Laitin and only incidentally about Somalia; thus the reason for his rather catch-all title. There is a vivid description of his problems with skittish immigration officials in emergent Africa, and the demanding, even perilous task of an American attempting to survive in a remote region of the underdeveloped world, namely the North-Eastern Province of Kenya, a disputed territory inhabited by ethnic Somalis.

The author faithfully reports his findings on a set of preconceived, highly structured research questions, using Somali subjects and social settings. He wanted to test theories of linguistic relativity in contemporary Africa, and the Somalis were chosen because most are bi-lingual and 'in the throes of an interminable debate concerning the language of politics' (p. 163). Laitin also wanted to determine if language has an independent effect on other social institutions, and whether or not the choice of a European language for official purposes by an African nation was not responsible for the perpetuation of a 'colonial mentality' (p. 164).

Politics, Languages, and Thought: the Somali experience consists of eight chapters and a conclusion. The first part contains a general discussion of

Politics Language And Thought The Somali Experience:

Politics, Language, and Thought David D. Laitin, 1977-05 When the Somali Republic received independence its parliamentary government decided to adopt three official languages English Italian and Arabic all languages of foreign contact Since the vast majority of the nation's citizens spoke a single language Somali which then had no written form this decision made governing exceedingly difficult Selecting any one language was equally problematic however because those who spoke the official language would automatically become the privileged class Twelve years after independence a military government was able to settle the acrimonious controversy by announcing that Somali would be the official language and Latin the basic script It was hoped that this choice would foster political equality and strengthen the national culture Politics Language and Thought is an exploration of how language and politics interrelate in the Somali Republic Using both historical and experimental evidence David D Laitin demonstrates that the choice of an official language may significantly affect the course of a country's political development Part I of Laitin's study is an attempt to explain why the parliamentary government was incapable of reaching agreement on a national script and to assess the social and political consequences of the years of nondecision Laitin shows how the imposition of nonindigenous languages produced inequalities which eroded the country's natural social basis of democracy Part 2 attempts to relate language to political thought and political culture Analyzing interviews and role playing sessions among Somali bilingual students Laitin demonstrates that the impact of certain political concepts is quite different when expressed in different languages He concludes that the implications of choosing a language are far more complex than previously thought because to change the language of a people is to change the ways they think and act politically

The Ecosystem of the Foreign Language Learner Ewa Piechurska-Kuciel, Magdalena Szyszka, 2015-03-12 This volume examines selected aspects of the foreign language learning process from an ecological perspective adopting a holistic view on complex interrelations among and within organisms L2 language learners and their milieus family school and society First of all the personal ecosystem of the learner is taken into consideration whereby two powerful influences are intertwined cognitive and affective aspects The learning space formed by the individual is largely shaped by their affective states coexisting in conjunction with their cognitive processes Moreover this specific space is also modified by a wider array of other personal ecosystems or those of cultures Hence the ecosystem of the foreign language learner is also subject to influences coming from sociocultural leverage that can be represented by people they know like parents and language teachers who can both

directly and indirectly manipulate their ecosystem At the same time other important forces such as culture as a ubiquitous element in the foreign language learning process also have the power to shape that ecosystem Accordingly the book is divided into three parts covering a range of topics related to these basic dimensions of foreign language acquisition the cognitive affective and socio cultural Part I Affective Interconnections focuses on the body of original empirical research into the affective domain of not only L2 language learners but also non native language teachers Part II Cognitive Interconnections reports on contributions on language learners linguistic processing and cognitive representations of concepts The closing part Socio cultural Interconnections provides new insights into language learning processes as they are affected by social and cultural factors
