British Universities' Guide to Graduate Study, 1993 The Passionate Economist Sally Sheard, 2013-11-28 Brian Abel Smith was one of the most influential expert advisers of the 20th century in shaping social welfare. He was a modern day Thomas Paine driven by a strong socialist mission to improve the lives of the poorest. This valuable and accessible book is the first biography of Abel Smith. It takes a historical perspective to analyse the development of health and social welfare systems since the 1950s, exposing the critical impact of long running debates on poverty and state responsibility especially in Britain. This book also provides the first comparative study of how developing countries sought better health and social welfare enabled by the World Health Organization and other agencies for whom Abel Smith regularly worked. This book offers an engaging and useful study for students and researchers in health and social policy, history, politics and economics, and interested general readers. It will also be essential reading for professionals working in those government ministries and institutions that Brian Abel Smith helped to shape. LSE Pioneers in Social Policy: Brian Abel Smith, Richard Titmuss and Peter Townsend all based at the London School of Economics and Political Science made major contributions to the development of policies on the elderly, health care, law, poverty and welfare in the 20th century. This series of biographies tells the stories of these outstanding individuals, their backgrounds, ideas and work. The Directory of Graduate Studies, 1996 **Britain's Economic Performance** Tony Buxton, Paul Chapman, Paul G Chapman, Paul Temple, 2005-08-08 This new and substantially revised edition of Britain's Economic Performance provides a unique assessment of the current state of the supply side of the economy. Written by a team of highly experienced policy oriented applied economists, this volume will be a valuable source of reference, analysis and guidance for students and policy makers. *Decision Making for Enhanced Health Security* Gilberto Montibeller, 2022-06-06 Health threats pose significant dangers to humankind and form a major source of human suffering and sorrow. Responsible leadership and reasoned decision making can significantly improve the arenas that are affected by health threats through establishing a better allocation of very scarce resources for building health capabilities and for increasing health preparedness, responsiveness and resilience. This book examines how public health leaders can use the cutting edge research from Decision Sciences to better manage emerging and re-emerging health threats with a focus on enhancing health security. While these decisions must be informed by the best available evidence, they must also address competing priorities and key uncertainties and must mitigate critical risks albeit in a cost effective manner which seeks to maximize societal value. This is a book about how decisions on health security can be improved both in terms of the content that is utilized in a health decision analysis and the decision processes that are employed in reaching a decision. This decision focused perspective can help public health leaders and public health experts to increase the health preparedness of health systems, the task of which involves improving health capabilities, increasing the robustness of health systems against health threats as well as strengthening health resilience and the responsiveness of these systems against disease outbreaks.
