Although substantial critical commentary has addressed children's animal stories and animals in adult fiction very few studies have been devoted to adolescent animal encounters. In *Animals in Young Adult Fiction* Walter Hogan examines several hundred novels and stories to explore the ways in which animals are represented in these works. In addition to providing an historical survey Hogan looks at both realistic fiction and speculative works including fantasy, supernatural horror and science fiction. Hogan reviews stories that feature wild animal encounters, stories centered on relationships with horses, dogs and other working and performing animals and those featuring relationships with pets. Drawing upon established scholarship this book examines human animal relationships from multiple angles making it an invaluable resource for librarians, teachers and students of children's and young adult literature.
