Perspectives on the 'Bilingual Advantage': Challenges and Opportunities Peter Bright,Roberto Filippi,2019-09-05 The claim that multilanguage acquisition drives advantages in executive function is currently an issue of vigorous debate in academic literature Critics argue that evidence for this advantage has been confounded by unsound or questionable methodological practices with some investigators abandoning research in this area altogether indicating either that there is no bilingual advantage or that it is impossible to capture and therefore rule out alternative explanations for group differences Over the past decade and against this backdrop theory has developed from a relatively narrow focus on inhibitory control to incorporate theory of mind rule based learning reactive and proactive control visuo spatial memory and control of verbal interference in speech comprehension Most recently authors have claimed that the process of becoming bilingual may also impact on metacognitive abilities The fundamental issue is whether the limited capacity and goal directed selectivity of our executive system can somehow be enhanced or otherwise profit from the continuous intense competition associated with communicating in multilingual environments However although this issue has received much attention in academic literature the question of which cognitive mechanisms are most influenced by the enhanced competition associated with multilingual contexts remains unresolved Therefore rather than dismissing this important topic we advocate a more systematic approach in which the effects of multilingual experience are assessed and interpreted across well defined stages of cognitive development We encourage a broad developmentally informed approach to plotting the trajectory of interactions between multi language learning and cognitive development using a convergence of neuroimaging and behavioral methods across the whole lifespan Moreover we suggest that the current theoretical framing of the bilingual advantage is simplistic and this issue may limit attempts to identify specific mechanisms most likely to be modulated by multilingual experience For example there is a tendency in academic literature to treat executive function as an essentially unitary fronto parietal system recruited in response to all manner of cognitive demand yet performance across so called executive function tasks is highly variable and intercorrelations are sometimes low It may be the case that some higher level mechanisms of executive function remain relatively unaffected while others are more sensitive to multilingual experience and that there may be disadvantages as well as advantages which themselves may be sensitive to factors such as age In our view there is an urgent need to take a more fine grained approach to this issue so that the strength and direction of changes in diverse cognitive abilities associated with multilanguage acquisition can be better understood This book compiles work from psychologists and neuroscientists who actively research whether how and the extent to which multilanguage acquisition promotes enhanced cognition or protects against age related cognitive or neurological deterioration We hope this collection encourages future efforts to drive theoretical progress well beyond the highly simplistic issue of whether the bilingual cognitive advantage is real or spurious

Social and Environmental Issues in Advertising Sukki Yoon, Sangdo Oh, 2018-10-11. In the past few decades attention has turned to the need to apply commercial marketing concepts knowledge and techniques to promote goods services and actions that enhance consumer well being and social welfare through socially and environmentally responsible advertising for example recycling promotions. Critics argue however that for profit advertisers who endorse social responsibility are inherently serving commercial purposes and diluting the value of socially responsible advertising. Scholars in many fields advertising marketing communications and psychology explore ways to encourage consumers companies and policymakers to adopt socially responsible behaviours and to provide theoretical and practical insights regarding effective applications of pro social and pro environmental marketing messages. This book comprises ten chapters that contribute to advertising theory research and practice by providing an overview of current and diverse research that compares contrasts and reconciles conflicting views regarding social and environmental advertising uncovering individual differences in perception of advertising messages and their consequences for social and environmental behaviours reconciling societal and business interests identifying a message factor that determines eco friendly behaviours and identifying source factors that enhance and weaken advertising effectiveness. This book was originally published as a special issue of the International Journal of Advertising.

Multicultural Reflections on "race and Change" Kitty Oliver, 2006. Few places in the United States provide the goldmine of diversity found in South Florida and what better place to look at race relations past and present from a variety of cultural perspectives. The Race and Change Project has produced an impressive oral history archive housed at the African American Research Library and Cultural Center in Fort Lauderdale which features over 100 interviews with Blacks Whites and immigrants all talking about their race relations experiences before and after the Civil Rights Act of 1964. A multi ethnic group of students at Florida Atlantic University in Boca Raton Florida most not even born then were challenged to confront these historical accounts and explore their own generational experiences around race in thoughtful candid creative ways. The result is this collection *Multicultural Reflections on Race and Change*. It features 22 writers who blend their personal stories with the voices of archival oral histories weaving a rich tapestry of memories into a dialogue on differences that is sure to spark more discussion.
