Ghosts of Archive Verne Harris, 2020-12-21 Ghosts of Archive draws on the discourses of deconstruction intersectionality and archetypal psychology to mount an argument that archive is fundamentally and structurally spectral and that the work of archive is justice Drawing on more than 20 years of the author's research on deconstruction and archive the book posits archive as an essential resource for social justice activism and as a source or location of soul for individuals and communities Through explorations of what Jacques Derrida termed hauntology Harris invites a listening to the call for justice in conceptual spaces that are non disciplinary He argues that archive is both constructed in relation to and beset by ghosts ghosts of the living of the dead and of those not yet born and that attention should be paid to them Establishing a unique nexus between a deconstructive

intersectionality and traditions of memory for justice in struggles against oppression from South Africa and elsewhere the book makes a case for a deconstructive praxis in today's archive Offering new ideas about spectrality banditry and archival activism Ghosts of Archive should appeal to those working in the disciplines of archival science information studies and psychology It should also be essential reading for those with an interest in social justice issues transitional justice history philosophy memory studies and postcolonial studies

[Hume's Critique of Religion: 'Sick Men's Dreams'](#) Alan Bailey, Dan O'Brien, 2013-10-10 In this volume authors Alan Bailey and Dan O'Brien examine the full import of David Hume's arguments and the context of the society in which his work came to fruition They analyze the nuanced nature of Hume's philosophical discourse and provide an informed look into his position on the possible content and rational justification of religious belief The authors first detail the pressures and forms of repression that confronted any 18th century thinker wishing to challenge publicly the truth of Christian theism From there they offer an overview of Hume's writings on religion paying particular attention to the inter relationships between the various works They show that Hume's writings on religion are best seen as an artfully constructed web of irreligious argument that seeks to push forward a radical outlook one that only emerges when the attention shifts from the individual sections of the web to its overall structure and context Even though there is no explicit denial in any of Hume's published writings or private correspondence of the existence of God the implications of his arguments often seem to point strongly towards atheism David Hume was one of the leading British critics of Christianity and all forms of religion at a time when public utterances or published writings denying the truth of Christianity were liable to legal prosecution His philosophical and historical writings offer a sustained and remarkably open critique of religion that is unmatched by any previous author writing in English Yet despite Hume's widespread reputation amongst his contemporaries for extreme

irreligion the subtle and measured manner in which he presents his position means that it remains far from clear how radical his views actually were
