Troubled Waters Mehran Kamrava, 2018-05-15 *Troubled Waters* looks at four dynamics in the Persian Gulf that have
contributed to making the region one of the most volatile and tension filled spots in the world Mehran Kamrava identifies the
four dynamics as the neglect of human dimensions of security the inherent instability involved in reliance on the United
States and the exclusion of Iraq and Iran the international and security policies pursued by inside and outside actors and a
suite of overlapping security dilemmas These four factors combine and interact to generate long term volatility and ongoing
tensions within the Persian Gulf Through insights from Kamrava's interviews with Gulf elites into policy decisions the
consequences of security dilemmas the priorities of local players and the neglect of identity and religion *Troubled Waters*
examines the root causes of conflicts and crises that are currently unfolding in the region As Kamrava demonstrates each
state in the region including Saudi Arabia Iran and Qatar has embarked on vigorous security producing efforts as part of
foreign policy flooding the area with more munitions thereby increasing insecurity and causing more mistrust in a part of the
world that needs no more tension Primacy and Its Discontents Michael E. Brown, Owen R. Cote, Sean M.

Lynn-Jones, Steven E. Miller, 2009-01-30 Experts consider whether American primacy will endure or if the future holds a
multipolar world of several great powers The unprecedented military economic and political power of the United States has
led some observers to declare that we live in a unipolar world in which America enjoys primacy or even hegemony At the
same time public opinion polls abroad reveal high levels of anti Americanism and many foreign governments criticize U S
policies *Primacy and Its Discontents* explores the sources of American primacy including the uses of U S military power and
the likely duration of unipolarity It offers theoretical arguments for why the rest of the world will or will not align against the
United States Several chapters argue that the United States is not immune to the long standing tendency of states to balance
against power while others contend that wise U S policies the growing role of international institutions and the spread of
liberal democracy can limit anti American balancing The final chapters debate whether countries are already engaging in soft
balancing against the United States The contributors offer alternative prescriptions for U S foreign policy ranging from

vigorous efforts to maintain American primacy to acceptance of a multipolar world of several great powers Contributors Gerard Alexander Stephen Brooks John G Ikenberry Christopher Layne Keir Lieber John Owen IV Robert Pape T V Paul Barry Posen Kenneth Waltz William Wohlforth **Health & Human Development in the New Global Economy** World Health Organization,2000 This publication is the result of a collaborative effort between the Pan American Health Organization and the WHO Collaborating Center for International Health at the University of Texas Medical Branch The chapters are based on the proceedings from a seminarworkshop held in Galveston Texas in 1998 The objective of this forum was to examine the impact of the economic globalization process and technological change on health trends in the Region of the Americas and even more specifically to explore how civil society groups can influence the formulation of healthy public policies and monitor equity in terms of both the health situation and the distribution of health care resources This publication addresses a wide range of issues affecting health in the global economy including various types of economic organization and potential dangers the world faces as a new century begins It centers on experiences opportunities and risks in the Americas and on the value of health in human development and of international and regional integration processes in the formulation of a new global economy It includes articles analyzing the impact of economic reform policies on health in general as well as monographs written from the perspective of civil society groups in specific countries The variety of viewpoints and lessons learned in this publication will be of use to decision makers health and development experts and emerging civil society groups in Latin America and the Caribbean and can guide them in better addressing the enormous risks facing all sectors of society as a result of globalization by enabling them to take advantage of the tremendous potential this process affords
