On a Global Mission: The Automobiles of General Motors International Volume 3 Louis F. Fourie, 2016-12-27
Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

World Motor Vehicle Data 2008, 2008 *Ward's World Motor Vehicle Data 2009*, 2009 *The Korean Automotive Industry, Volume 1* A. J. Jacobs, 2021-12-10. In 1962 South Korea assembled just 1 100 new automobiles. By 1996 this total had soared to 2 812 714. What explains this remarkable growth? The answer is complex and involves a combination of a supportive State, timely technology alliances, a skilled but historically low paid workforce, aggressive pricing, savvy entrepreneurs and fortuitous circumstances. Despite this amazing ascent, comparatively little has been written about the Korean auto industry in English. In the first of a two volume set, this 11 chapter book seeks to help fill this void by providing in depth examinations of all six of Korea's automakers from their beginnings through 1996. Uniquely written from the perspective of industry analysts at the time without knowledge of the Asian Fiscal Crisis, the book should prove informative to practitioners, scholars and students interested in automotive history, international political economy, Asian studies and more.

The Korean Automotive Industry, Volume 2 A.J. Jacobs, 2023-08-24. This volume chronicles the maturation of the South Korean auto industry and its native automakers from the 1997 Asian Crisis to 2019. After examining the context for domestic vehicle production in South Korea, the author presents multiple case studies for all five Korean automakers: General Motors Korea, Daewoo Motors, Kia, Hyundai, Ssangyong and Renault Samsung. This includes coverage of Hyundai Kia's foreign plants in North America, Europe, India, China and Emerging Asia. The book closes by assessing the five to ten year future outlooks for Korean automakers at home and abroad. This important work will prove informative to scholars of business management.
