**Terrains of Mine Closure in the Philippines** Minerva Chaloping March, 2017-08-23 The current discourse on mine closure is informed predominantly by industry and corporate perspectives and predicated by experiences of mainly mining companies that are based in developed countries where necessary planning frameworks and regulatory requirements are well established Mine closure planning well promoted and accepted as good business practice in the global minerals industry has been primarily technical and precautionary both in approach and focus Planning modelling and monitoring strategies incorporate comprehensive and detailed elements such as properties inherent in landforms climate geology flora and fauna among others However locality based concerns that revolve around resource access and tenure rights and entitlements tied to locality and indigeneity labour recruitment and other non bio physical elements are hardly examined Any mine closure program that omits these elements is deficient and therefore ineffective Social Terrains of Mine Closure in the Philippines based on ethnographic research and archival materials presents the varying experiences of three mines to demonstrate that the mine closure process is an intense locus for competition and compromises among various social actors This book offers key messages for understanding the complex socio cultural economic political and business realities that make up the social

terrains of mine closure and will be of great interest to students and researchers in development studies community development business studies anthropology and sociology It will also appeal to those working in the global minerals sectors and NGOs that engage in development work and advocacy for responsible mining

**Industrialising Rural India** Kenneth Nielsen, Patrik Oskarsson, 2016-10-04 Rapid industrialisation is promoted by many as the most feasible way of rejuvenating the Indian economy and as a way of generating employment on a large scale At the same time the transfer of land from rural communities and indigenous groups for industrial parks mining or Special Economic Zones has emerged as perhaps the most explosive issue in India over the past decade Industrialising Rural India sheds light on crucial political and social dynamics that unfold today as India seeks to accelerate industrial growth The volume examines key aspects that are implicated in current processes of industrialisation in rural India including the evolution of industrial and related policies the contested role of land transfers dispossession and the destruction of the natural resource base more generally and the popular resistance against industrial projects extractive industries and Special Economic Zones Combining the work of scholars long established in their respective fields with the refreshing approach of younger scholars Industrialising Rural India seeks to chart new ways in the study of contemporary industrialisation and its associated challenges in India This cutting edge interdisciplinary work will be of interest to scholars working on industrial development and land questions in India and South Asia alongside those with an interest in sociology political science and development research

**Responsible Mining** Sara Bice, 2016-06-23 Mining can have negative environmental and social impacts but can also be responsible However corporations have little impetus to act responsibly without being held to account by an informed and active public and by strong institutions and governments which not only create but also enforce legislation Yet what does such practice look like This book shows how the concept of responsible mining is based on five key principles or pillars holistic assessment ethical relationships community based agreements appropriate boundaries and good governance Together these pillars circumscribe global best practice and innovative ideas to catalyse new and improved approaches to a sustainable mining industry The author argues that these practices are critical to the future viability and social acceptability of the global mining industry and draws on a range of case studies including from Australia Canada Central Asia Papua New Guinea and west Africa The role of informed communities governments and civil societies in holding the industry to account to achieve responsible mining is assessed The book explains how companies judge what effects they may have on communities and investigates ways to improve the prediction and prevention of such impacts and to provide clearer more meaningful public communication It offers alternatives to common corporate social responsibility practices in which mining companies adopt roles which are usually the remit of government Ultimately it looks to the future exploring the essential pathways towards responsible mining

Stakeholders, Sustainable Development Policies and the Coal Mining Industry Izabela Jonek-Kowalska, Radosław Wolniak, Oksana A. Marinina, Tatiana V. Ponomarenko, 2022 This book identifies the impact of internal and external stakeholders on the implementation of sustainable development policies in the coal mining sector in Europe and Commonwealth Of Independent States The book assesses what activities and conditions need to be improved so sustainable development policies can be more effectively and efficiently implemented With a specific focus on the hard coal and lignite mining sectors it examines a broad range of case studies from Eastern European countries and Commonwealth Of Independent States including Russia Ukraine Poland Kazakhstan Germany Spain France and United Kingdom among many more Beginning with an introduction to sustainable development and stakeholder theory Part II then examines internal stakeholders including owners managers employees and trade unions Part III examines external stakeholders touching upon

those directly related to the mining industry such as customers and mining enterprises and those not directly associated such as local and regional communities and environmental organisations The book concludes by proposing a model approach to the management of stakeholders involved in mining enterprises focusing on improving the process of implementing sustainable development in the mining sector and strengthening the effects of this process This book will be of great interest to students and scholars of the extractive industries natural resource management and policy and sustainable development

Future Transitions in the Mining Industry Tuija Mononen,Lasse Peltonen,2025-10-09 This volume focuses on mining and the challenges for this industry as it transitions and evolves as the demand for products and responsible and sustainable mining ever increases Mining is a prerequisite for modern society yet the industry is often criticized for having many negative environmental and social impacts The volume explores the challenges controversies and responses that arise when a society is reliant on the products of mining to maintain their standard of living yet are simultaneously calling for the implementation of sustainable practices with many communities also being resistant to mining activities taking place in their own location Many transitions which present a solution to one problem can often lead to new issues and developments elsewhere For example the electrification of vehicles will help to mitigate climate change but this will simultaneously increase the demand for minerals required for batteries The acceptance of or resistance to mining varies from location to location and across different scales with key factors relating to the social and environmental impacts and the economic benefits One common tension revolves around whether local communities really benefit economically from mining activities and even if they do they could now be negatively impacted by the digitization of the industry which will naturally lead to a reduction in the number of jobs This volume explains how transitions of these types are inextricably linked by demand acceptance and the perception of benefits and that as the industry evolves more tensions and controversies will develop This book will be of great interest to scholars and students of mining and the extractive industries transitions and sustainable development as well as to professionals working in natural resource management **Ridout, William , Sustainable**

**Mining Governance** Jose Andrés Domínguez-Gómez,André Xavier,Rocío Muñoz-Moreno,2025 This volume provides a transdisciplinary analysis of the political social and environmental aspects of governance and its implementation in the mining sector In a world profoundly shaped by the energy transition and the urgency of climate change mining faces a dual challenge On one hand it is expected to play a crucial role in the shift toward a more sustainable socioeconomic model On the other it operates within a context marked by deep economic social political and environmental tensions across multiple territories This book offers a critical transdisciplinary and rigorous exploration of a key concept for understanding this dilemma governance Through a theoretical and practical journey ranging from colonial extractivism to current models of sustainability and corporate responsibility it provides a comprehensive look at how formal and informal power structures community relations social and environmental impact assessments and regulatory frameworks shape the present and future

of mining With a participatory approach that brings together voices from academia government NGOs and the private sector the book not only analyzes the various dimensions of mining governance but also presents practical examples and case studies to better understand its sociopolitical environmental and economic complexity From the role of the Social License to Operate to mine closure and post closure planning and waste management this work invites readers to rethink mining as a long term territorial development project This book will be of great interest to students and scholars of the mining and extractive industries natural resource governance environmental governance and sustainable development Provided by publisher *Routledge Studies of the Extractive Industries and Sustainable Development* , Governance in the Extractive Industries Lori Leonard,Siba N'Zatioula Grovogui,2017 This book explores emergent forms of governance in mining and extractive industry projects around the world *EXTRACTIVE INDUSTRIES.
