What are the factors which would make an individual more inclined to choose your brand? This book offers a way to predict which brand a buyer will purchase. It looks at brand performance within a product category and tests it in different countries with very different cultures. Following the Predictive Brand Choice (PBC) model, this book seeks to predict a consumer's loyalty and choice. Results have shown that PBC can achieve a high level of predictive accuracy in excess of 70% in mature markets. This accuracy holds even in the face of price competition from a less preferred brand. PBC uses a prospective predicting method which does not have to rely on a brand's past performance or a customer's purchase history for prediction. Choice data is gathered in the retail setting at the point of sale. *The Strategy of Global Branding and Brand Equity* presents survey data and quantitative analyses that prove the method described to be practical, useful and implementable for both researchers and
