In a sweeping look at state of the art breakthroughs in artificial intelligence robotics computer science psychology and neural networks neural networks expert Maureen Caudill reveals how close we are to achieving artificial vision language recognition problem solving memory and other requisites of intelligent robots She asserts that as our ability to make faster smaller cheaper computers blends with our ability to mimic the behavior of the human mind the first truly intelligent machines come closer to existence Yet she warns that there will likely be some unexpected and perhaps unpleasant consequences as androids will compete with humans for jobs and issues of ownership of an artificial being will come into play This fascinating book also prepares us for the day when we must learn to share the world with another intelligent species of our own creation
