Sustainable and Responsible Entrepreneurship and Key Drivers of Performance Popescu, Cristina Raluca Gh., Verma, Rahul, 2021-06-25 Today's entrepreneurial practices operate in a continuously challenging highly dynamic and everchanging environment. In these times of change, it is important to examine up-to-date theoretical infrastructure on the most powerful and representative approaches to sustainable and responsible entrepreneurship. *Sustainable and Responsible Entrepreneurship and Key Drivers of Performance* covers an updated view of the newest trends, novel practices, and latest tendencies concerning sustainable and responsible entrepreneurship in a world dominated by insecurity and dramatic economic, political, and managerial changes. The book presents theoretical infrastructure on approaches to sustainable and responsible entrepreneurship as well as empirical results that make a tremendous contribution to the analysis of organizations' performance, key drivers. Elaborating on topics such as greening economy, intellectual capital, knowledge management, sustainable entrepreneurial ecosystems, and social responsibility, this text is essential for entrepreneurs, managers, executives, academicians, scientists, researchers, students, practitioners, and policymakers worldwide. *Root, Tuber and Banana Food System Innovations* Graham Thiele, Michael Friedmann, Hugo Campos, Vivian Polar, Jeffery W. Bentley, 2022-04-06 This open access book describes recent innovations in food systems based on root, tuber, and banana crops in developing countries. These innovations respond to many of the challenges facing these vital crops linked to their vegetative seed and bulky and perishable produce. The innovations create value, food jobs, and new sources of income while improving the wellbeing and quality of life of their users. Women are often key players in the production, processing, and marketing of roots, tubers, and bananas, so successful innovation needs to consider gender. These crops and their value chains have long been neglected by research and development; hence, this book contributes to filling in the gap. The book features many outcomes of the CGIAR Research Program in Roots, Tubers, and Bananas (RTB), which operated from 2012 to 2021, encompassing many tropical countries, academic and industry partners, multiple crops, and major initiatives. It describes the successful innovation model developed by RTB that brings together diverse partners and organizations to create value for the end users and to generate positive economic and social outcomes. RTB has accelerated the scaling of innovations to reach many end users cost effectively. Though most of the book's examples and insights are from Africa, they can be applied worldwide. The book will be useful for decision makers designing policies to scale up agricultural solutions for researchers and extension specialists seeking practical ideas and for scholars of innovation. **Enhancing Food Security and Trade Resilience in Sustainable Agricultural Systems** Wenjin Long, Catherine Keske, Fuyou Guo, 2025-10-23 Food security is a critical global challenge influenced by complex interactions between agriculture, trade, and market dynamics. As countries navigate the impacts of climate change and economic fluctuations, sustainable agricultural practices become essential for ensuring a stable food supply. International trade agreements such as the China-Pakistan Free Trade Agreement and the

pathways established by the Belt and Road Initiative significantly shape domestic agricultural economies Understanding how these agreements affect food access sovereignty and production sustainability is crucial for developing resilient food systems Despite the recognised importance of these interconnections there is limited research that comprehensively examines the interplay between trade policies and sustainable agricultural practices in supporting food security Many existing studies focus on individual aspects neglecting the integrated nature of these systems This Research Topic aims to fill this gap by exploring how trade dynamics local agricultural strategies and policy frameworks can enhance food security and resilience By synthesising diverse case studies and analyses we aim to identify best practices and effective pathways to strengthen both trade and local agricultural sustainability in various contexts

Proven Successes in Agricultural Development David J. Spielman, Rajul Pandya-Lorch, 2010-01-01 The world has made enormous progress in the past 50 years toward eliminating hunger and malnutrition While in 1960 roughly 30 percent of the world's population suffered from hunger and malnutrition today less than 20 percent do some five billion people now have enough food to live healthy productive lives Agricultural development has contributed significantly to these gains by increasing food supplies reducing food prices and creating new income and employment opportunities for some of the world's poorest people This book examines where why and how past interventions in agricultural development have succeeded It carefully reviews the policies programs and investments in agricultural development that have reduced hunger and poverty across Africa Asia and Latin America over the past half century The 19 successes included here are described in in depth case studies that synthesize the evidence on the intervention's impact on agricultural productivity and food security evaluate the rigor with which the evidence was collected and assess the tradeoffs inherent in each success Together these chapters provide evidence of what works in agricultural development

The Cassava Transformation Felix I. Nweke, John K. Lynam, Dunstan S. C. Spencer, 2002 Cassava is Africa's second most important food crop The cassava transformation that is now underway in West Africa is fueled by new high yielding TMS varieties that have transformed cassava from a low yielding famine reserve crop to a high yielding cash crop for both rural and urban consumers The book highlights the role of cassava as a poverty fighter by increasing cassava productivity and driving down the cost of cassava in rural and urban diets

Agriculture in Tanzania Since 1986, 2000-01-01 An investigation into the place of agriculture in the economy of Tanzania

The Sweetpotato Gad Loebeinstein, George Thottappilly, 2009-03-21 In the last four decades of the twentieth century the use of sweetpotato was diversified beyond their classification as subsistence food security and famine relief crop In developing countries they serve both as human food and for feeding livestock In Western countries they appeal to health conscious consumers because of their nutritional aspects The sweetpotato is very high in nutritive value and merits wider use on this account alone The book has 2 parts A general one giving up to date information on the history botany cultivars genetic engineering propagation diseases and pests nutritional data and marketing and a second part presenting data on sweetpotato growing practices in

different areas of the world The information should be useful to researchers practitioners and crop administrators in different countries
