*17th International Conference on Information Technology-New Generations (ITNG 2020)* Shahram Latifi, 2020-05-11 This volume presents the 17th International Conference on Information Technology New Generations ITNG and chronicles an annual event on state of the art technologies for digital information and communications The application of advanced information technology to such domains as astronomy biology education geosciences security and healthcare are among the themes explored by the ITNG proceedings Visionary ideas theoretical and experimental results as well as prototypes designs and tools that help information flow to end users are of special interest Specific topics include Machine Learning Robotics High Performance Computing and Innovative Methods of Computing The conference features keynote speakers a best student contribution award poster award and service award a technical open panel and workshops exhibits from industry government and academia

**Proceedings of the XVIII International symposium Symorg 2022 (BOOK OF ABSTRACTS)** Marko Mihić, Sandra Jednak, Gordana Savić, With 140 contributions by authors from 19 different countries XVIII International Symposium of Organizational Sciences SymOrg 2022 successfully sets the high level for future conferences The topic of SymOrg 2020 Sustainable Business Management and Digital Transformation Challenges and Opportunities in the Post COVID Era attracted researchers from different institutions both in Serbia and abroad This year more than 300 scholars and practitioners authored and co authored scientific and research articles that had been accepted for publication in the Book of Abstracts All the contributions to the Book of Abstracts are classified into the following 13 key topics Blockchain Technology in Business and Information Systems Business Analytics Creativity Innovation and Sustainable Management Digital Operations and Logistics Management Digital Transformation of Financial Industry Digital Transformation of Public Administration E Business Ecosystems Evidence Based Public Policy Making in the Post COVID Environment LEAN Business Systems Structures Processes and Models Managing Digital Transformation Projects under Discontinuity Managing Human Resources in the Post COVID Era Rethinking Marketing and Communication in the Post COVID Era Quality Management and Standardization in Digital Transformation Era The participation of numerous domestic and international authors and the diversity of topics justify our efforts to organize the Symposium As SymOrg is traditionally at the intersection of academy and business we believe that this year s meeting will bring about many in depth discussions contribute to prospective partnerships and build stronger business and academic networks We also believe that meeting will contribute to the exchange of knowledge research results and experience among industry experts research institutions and faculties which all share a common interest in contemporary organizational sciences We are very grateful to our distinguished keynote and plenary speakers Ana Draskovic Aleksander Aristovnik Manuel Mazzara Basant Agarwa and Priyanka Harjule Also special thanks to moderators for organizing the panels and workshops in the fields of higher education business supply chain doctoral research studies and student engagement and sustainability The Faculty of Organizational

Sciences would like to express its gratitude to the Ministry of Education Science and Technological Development and all the partners and individuals who have supported and contributed to the organization of the Symposium We are particularly grateful to the contributors and reviewers who made this issue possible But above all we are especially thankful to the authors and presenters for making SymOrg 2022 a success Belgrade June 6 2022 Marko Mihi Ph D Sandra Jednak Ph D Gordana Savi Ph D Redecentralisation Ruth Wandhöfer,Hazem Danny Nakib,2023-04-21 The rise of smartphones social media cryptocurrencies and digital assets has changed our lives profoundly over the last decade In tandem the relationship between governments citizens and businesses has evolved creating new sets of challenges and imbalances but also opportunities This book focuses on the evolving digitisation of the financial industry and the impact this has on users Particular attention is given to the emergence of new technologies such as blockchain smart contracts and AI The increasingly interconnected data driven digital economy which includes many aspects of an individual s and organisation s life has become a challenge for regulators too Matters are complex but also increasingly centralised with a growing trend of distrust Should we push for more decentralisation To shed light on this question we begin by providing an overview of key concepts and develop a high level qualitative framework and approach to what we call Redecentralisation Delving into those technology areas that form part of the tectonic plate shift of our financial system we explore the pillars of money and payments that are at a turning point with the replacement of key infrastructural components necessary for the future of what we call the Digital Financial Ecosystem Digital identity and data privacy also form part of this broader puzzle We then look to the future to consider some of the latest trends and what if scenarios Where do we see Redecentralisation at play in the Digital Financial Ecosystem What is the role of technology in this e g Web3 the Metaverse and Decentralised Finance Can Redecentralisation support an alignment of values across people governments and businesses What is the role of technology in this And finally do we need a new digital social contract to underpin and protect our digital lives Big Data and HPC: Ecosystem and Convergence Lucio Grandinetti,Reza Shahbazian,Thomas Sterling,Vladimir Voevodin,2018-08-15 Due to the increasing need to solve complex problems high performance computing HPC is now one of the most fundamental infrastructures for scientific development in all disciplines and it has progressed massively in recent years as a result HPC facilitates the processing of big data but the tremendous research challenges faced in recent years include the scalability of computing performance for high velocity high variety and high volume big data deep learning with massive scale datasets big data programming paradigms on multi core GPU and hybrid distributed environments and unstructured data processing with high performance computing This book presents 19 selected papers from the TopHPC2017 congress on Advances in High Performance Computing and Big Data Analytics in the Exascale era held in Tehran Iran in April 2017 The book is divided into 3 sections State of the Art and Future Scenarios Big Data Challenges and HPC Challenges and will be of interest to all those whose work involves the processing of Big Data and the use of HPC *Real-Time Intelligence for Heterogeneous Networks*

Fadi Al-Turjman,2021-09-02 This book discusses several exciting research topics and applications in the intelligent Heterogenous Networks Het Net and Internet of Things IoT era We are resolving significant issues towards realizing the future vision of the Artificial Intelligence AI in IoT enabled spaces Such AI powered IoT solutions will be employed in satisfying critical conditions towards further advances in our daily smart life This book overviews the associated issues and proposes the most up to date alternatives The objective is to pave the way for AI powered IoT enabled spaces in the next generation Het Net technologies and open the door for further innovations The book presents the latest advances and research into heterogeneous networks in critical IoT applications It discusses the most important problems challenges and issues that arise when designing real time intelligent heterogeneous networks for diverse scenarios *Virtual Technologies and E-Collaboration for the Future of Global Business* Zhao, Jingyuan,Richards, Joseph,2022-06-17 Effective collaboration technologies and tools are critical to the development of contemporary business landscapes especially as more businesses offer fully remote or hybrid work options Effective communication is key to increasing work productivity and absolutely essential for project managers and teams working to achieve their end goals Individuals and businesses can benefit from research on the design execution and assessment of collaboration applications as they strive for effective tools to increase virtual forms of communication It is essential that businesses remain up to date with and incorporate these emerging virtual technologies and e collaboration into their practices Virtual Technologies and E Collaboration for the Future of Global Business examines the most recent findings in knowledge intensive collaborative environments with a focus on methodologies and strategies for increasing online collaboration It discusses the emerging technologies and tools for collaboration in virtual environments and includes findings in automation computing and intelligent information systems as well as state of the art solutions covering various issues and challenges Covering topics such as capacity building groupware systems and knowledge management this premier reference source is an essential resource for business leaders and managers entrepreneurs board directors faculty and students of higher education technology directors and managers IT professionals researchers and academicians **Intelligent Technologies for Healthcare Business Applications** Athina Bourdena,Constandinos Mavromoustakis,Evangelos K. Markakis,George Mastorakis,Evangelos Pallis,2024-08-12 This book covers a wide range of applications and scenarios of intelligent technologies for healthcare business applications The authors adopt an interdisciplinary approach with both theoretical and practical approaches in order to be relevant to multiple audiences This book encapsulates fundamental and cutting edge research paradigms of intelligent healthcare environments and addresses related open ended research issues The authors also explore recent advances disseminate state of the art techniques and deploy novel technologies in intelligent healthcare services and applications The book features a broad appeal to electrical electronic computer software and telecommunications engineers in the healthcare space Covers a range of applications and scenarios of intelligent technologies for healthcare business applications Explores advances disseminates

techniques and deploys novel technologies in intelligent healthcare services Features paradigms of intelligent healthcare environments and addresses open ended research issues     Distributed Systems Andrew S. Tanenbaum, Maarten van Steen, 2007 No further information has been provided for this title     Smart Modelling for Engineering Systems Margarita N. Favorskaya, Alena V. Favorskaya, Igor B. Petrov, Lakhmi C. Jain, 2021-01-30 This book is a collection of research papers selected for presentation at the International Conference on Smart Computational Methods in Continuum Mechanics 2021 organized by Moscow Institute of Physics and Technology and the Institute for Computer Aided Design of Russian Academy of Sciences The work is presented in two volumes The primary objective of the book is to report the state of the art on smart computational paradigms in continuum mechanics and explore the use of artificial intelligence paradigms such as neural nets and machine learning for improving the performance of the designed engineering systems The book includes up to date smart computational methods which are used to solve problems in continuum mechanics engineering seismic prospecting non destructive testing and so on The main features of the book are the research papers on the application of novel smart methods including neural nets and machine learning computational algorithms smart software systems and high performance computer systems for solving complex engineering problems The case studies pertaining to the real world applications in the above fields are included The book presents a collection of best research papers in English language from some of the world leaders in the field of smart system modelling and design of engineering systems     *Distributed Systems* Andrew S. Tanenbaum, Maarten Van Steen, 2014     **Distributed Systems** George F. Coulouris, Jean Dollimore, Tim Kindberg, 2005 Up to date coverage of the latest development in this fast moving area including the debate between components and web services as the way for the industry to go increased emphasis on security and the arrival of ubiquitous computing in the form of among other things The Grid     *Distributed Systems*, 1991     **Distributed Systems** Andrew S. Tanenbaum, Maarten van Steen, 2002 Based on the formula of Tanenbaum s *Distributed Operating Systems* this text covers seven key principles of distributed systems communications processes naming synchronization consistency and replication fault tolerance and security     **Building Microservices** Sam Newman, 2021-07-24 As organizations shift from monolithic applications to smaller self contained microservices distributed systems have become more fine grained But developing these new systems brings its own host of problems This expanded second edition takes a holistic view of topics that you need to consider when building managing and scaling microservices architectures Through clear examples and practical advice author Sam Newman gives everyone from architects and developers to testers and IT operators a firm grounding in the concepts You ll dive into the latest solutions for modeling integrating testing deploying and monitoring your own autonomous services Real world cases reveal how organizations today manage to get the most out of these architectures Microservices technologies continue to move quickly This book brings you up to speed Get new information on user interfaces container orchestration and serverless Align system design with your organization s goals Explore options for integrating a service with your system

Understand how to independently deploy microservices Examine the complexities of testing and monitoring distributed services Manage security with expanded content around user to service and service to service models *Distributed systems* Coulouris,Jean Dollimore,Tim Kindberg,1995 *Advanced Mechanical Vibration: Modeling, Analysis, and Simulation* Bingen Yang,2025-02-28 Modeling analysis and simulation everything vibration engineering students need to succeed including late breaking advances in this ever changing field Advanced Mechanical Vibration covers modeling and analysis of vibrating systems with damping and gyroscopic effects dynamics of combined distributed lumped systems and approximate methods for solutions of complex vibration problems which are often overlooked in other such textbooks Case studies and pre coded MATLAB toolboxes for vibration analysis and simulation help readers understand and retain the most important concepts This is an ideal text for an upper undergraduate or graduate course in vibration engineering Includes both analytical and numerical methods for vibration analysis Addresses the latest developments in this fast changing field Prepares the student and professional for advanced R D Includes chapter ending questions with faculty only answer key multiple case studies and MATLAB toolkit for simulations SI units are used with a table converting to US **Distributed Systems,2/e** Andrew S. Tanenbaum,2007 **Distributed Systems** George F. Coulouris,Jean Dollimore,Tim Kindberg,2001 The chapters in this new edition have been revised and updated New material includes coverage of large scale applications fault modelling and fault tolerance models of system execution object orientation and distributed multimedia systems

*First Aid for the Basic Sciences: Organ Systems, Third Edition* Tao Le,William Hwang,Vinayak Muralidhar,Jared A. White,2017-01-22 Comprehensive single source coverage of the entire second year of medical school First Aid for the Basic Sciences Organ Systems Third Edition is a unique single source review of the entire second year medical school curriculum This full color richly illustrated and engagingly written resource provides readers with a solid understanding of basic sciences relative to human organ systems which all medical students must be familiar When used with the companion review First Aid for the Basic Sciences General Principles Third Edition this powerful combination distills must know course information to help students survive their first two years of medical school and provides an in depth review for the USMLE Step 1 An essential companion during your first two years of medical school Includes important foundational content most other reviews leave out Focuses on the high yield topics and facts tested on the USMLE Step 1 Enhanced by full color images learning aids tables and concise text to streamline your study and help you excel in coursework and on the USMLE Step 1 Provides a complete framework for understanding anatomy embryology pathology and pharmacology by organ systems Mirrors the table of contents of First Aid for the USMLE Step 1 to facilitate side by side study Written by students who aced the USMLE and reviewed by top faculty CISA Certified Information Systems Auditor All-in-One Exam Guide, Third Edition Peter H.
