Changing Conceptions, Changing Practices Angela Glotfelter, Caitlin Martin, Mandy Olejnik, Ann Updike, Elizabeth Wardle, 2022-12-28 Changing Conceptions Changing Practices demonstrates that it is possible for groups of faculty members to change teaching and learning in radical ways across their programs despite the current emphasis on efficiency and accountability Relating the experiences of faculty from disciplines as diverse as art history economics psychology and philosophy this book offers a theory and research based heuristic for helping faculty transform their courses and programs as well as practical examples of the heuristic in action The authors draw on the threshold concepts framework research in writing studies and theories of learning leadership and change to deftly explore why faculty are often stymied in their efforts to design meaningful curricula for deep learning and how carefully scaffolded professional development for faculty teams can help make such change possible This book is a powerful demonstration of how faculty members can be empowered when professional development leaders draw on a range of scholarship that is not typically connected In today's climate courses programs and institutions are often assessed by and rewarded for proxy metrics that have little to do with learning with grave consequences for students The stakes have never been higher particularly for public higher education Faculty members need opportunities to work together using their own expertise and to enact meaningful learning opportunities for students Professional developers have an important role to play in such change efforts WAC scholars and practitioners leaders of professional development and centers for teaching excellence program administrators and curriculum committees from all disciplines and faculty innovators from many fields will find not only hope but also a blueprint for action in Changing Conceptions Changing Practices Contributors Juan Carlos Albarr n Jos
