Journal Entry Ideas For Middle School Students:

Learning Journals in the K-8 Classroom Marcia S. Popp, 2012-11-12 *Learning Journals in the K 8 Classroom* is the first comprehensive presentation of how to use academic journals effectively for elementary level instruction. The text outlines the theoretical foundations for using learning journals and provides step by step suggestions for implementing them in every content area and at all levels of elementary instruction. Learning journals provide resources and support for reading aloud, independent reading, mini lessons, cooperative study, individual research, workshops, and the portfolio system. The type of interactive writing students do in learning journals helps them explore complex ideas in the content areas using their own strengths of analysis and response. The journals then become resources for future learning group discussions, individual conferences, learning assessment reports, and progress. Four introductory chapters show teachers how to create their own journals, introduce journals to students, integrate them with cooperative study, and use them for assessment. Additional chapters focus on the individual curriculum areas of literature, writing, mathematics, science, and social studies. The text includes sample entries from student journals at all grade levels and in every content area and appendices of annotated resources to support journaling and interviews with teachers who use journals in their classrooms. **Factors Influencing**

Middle School Students' Sense-making Discussions in Their Small-group Investigations of Force and Motion Cody Sandifer, 2001 In this study I adopted a combined individual and sociocultural perspective on learning in order to investigate small group discussions in an inquiry based middle school science classroom. The specific purpose of the study was to answer the following research questions: a) How can we classify students' sense making statements? b) To what extent do students engage in sense making discussion? SMD and c) Which factors provide support for students' SMD? To answer these questions, two groups were videotaped during the Interactions and Motion unit from the Constructing Ideas in Physical Science middle school curriculum. To classify students' sense making statements, I developed a six component framework for sense making discussion. My six components of sense making discussion are: predicting a phenomenon or experimental outcome, clarifying the facts of a phenomenon or experimental result, describing and explaining a phenomenon or experimental result, defining, describing, clarifying, and connecting scientific concepts, procedures, processes, and representations, testing knowledge, compatibility, and making a request for any of the above. The extent of students' sense making discussions was established by a) documenting instances of student sense making according to the six component scheme and then forming distributions of sense making instances, and b) calculating the percentage of time that groups dedicated to sense making discussion. To determine the influence that various factors have on students' sense making discussions, I first drew on the research in collaboration, discourse, and nonverbal sense making to arrive at an initial list of personal, group, task, and contextual factors that would likely influence the SMD. In this study, I then picked out significant quantitative differences in sense making between groups, students, and different portions of the curriculum (cycles, sub sections, etc.) and determined to what extent the

initial list of factors contributed to the significant differences in SMD and also to what extent any additional factors contributed to these differences My analysis showed that many of the factors from the initial list helped to explain the differences in sense making I also identified six other factors that contributed to these differences capacity for intra group guidance intellectual capacity time available for sense making external guidance awareness of the curriculum structure and an awareness and valuing of the curriculum goals
